

Gas Transmission Europe

# GTE+ progress towards ENTSOG

**Jacques Laurelut**

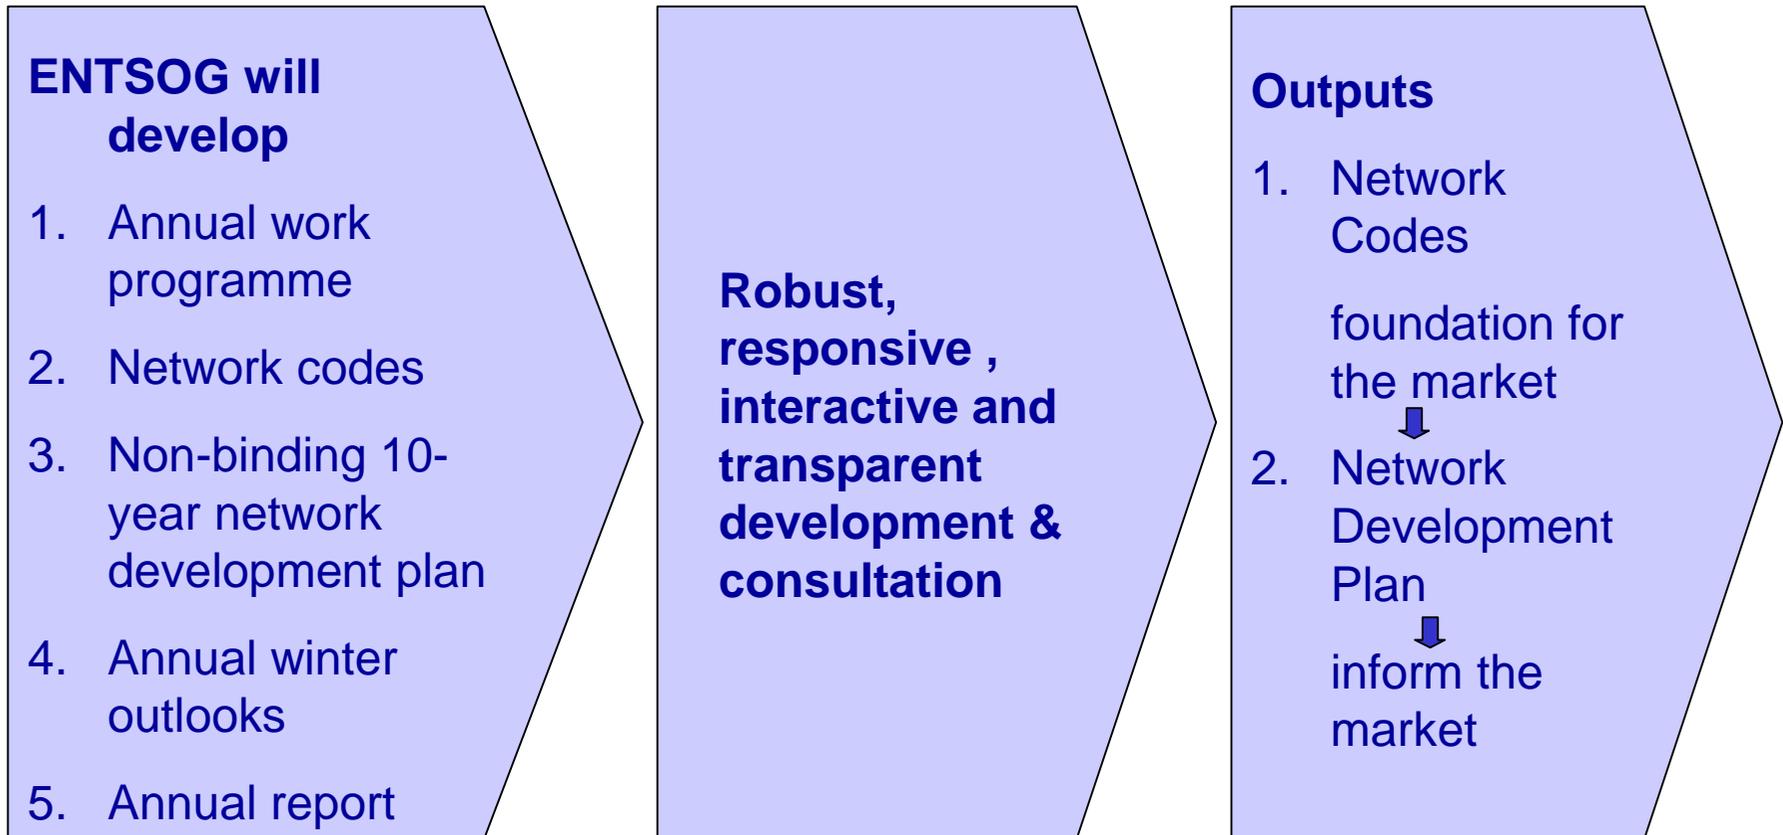

GTE President & GTE+ Transition Manager

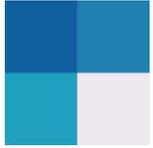

Madrid Forum 7th November 2008

## Third energy package – European Network of Transmission System Operators for Gas

**TSO role to facilitate market by providing capacity, services and information**

Gas Transmission Europe

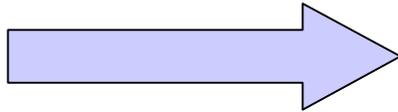

# TSO role in the market

- Unique position: TSOs
  - secure, reliable and efficient operation of the transmission networks, the backbone of the gas system
  - provide the market place for interested stakeholders
  - bridge the gap between the physical and contractual aspects of gas transmission (“the commodity-making principle”)
- TSOs and GTE will contribute to building an appropriate future European framework and processes, in close co-operation with the Commission, regulators and stakeholders

# Organisational development

'Yesterday': since 2003

**GTE**

**Interim upgraded organisation:**

- 3 full time senior advisors
- GTE president/GTE+ transition manager
- Liaison with ERGEG and other stakeholders
- è Work has started!

'Today': as from February 2008

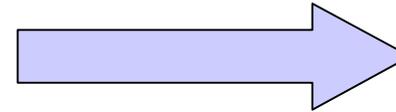

**GTE+**

**Agenda 2009**

- Establish new organisation + new way of working
- Deliver projects to facilitate market
- è Prove ENTSOG concept works!

'Next week': implementing 3<sup>rd</sup> package, 2011?

**ENTSOG**

**GTE+ and TSO members' commitment**

Gas Transmission Europe

## GTE+ Approach

- Same GTE+ resource level to deliver 2009 Work Programme
- Later transitional resources to be decided summer 2009
- “Differential” approach to reflect major environment differences
- GTE+ involvement in GRI

Gas Transmission Europe

## GTE+ First Annual Work Programme 2008-2009

- Organisational Development
  - Transparency Platform
  - Ten Year Network Development Statement
  - Winter Outlook
  - Capacity Co-ordination
  - Interoperability
- Statutes  
Annual Work Programmes (AWPs)

### **Feedback stakeholders on AWP 2008-2009**

- Consultation welcomed
- Stakeholders want to be involved
- Priorities broadly correct (some desire to look at “balancing”)
- Minor refinements to Project Plans desirable

Ž Work on AWP 2010: consultation May-June 2009

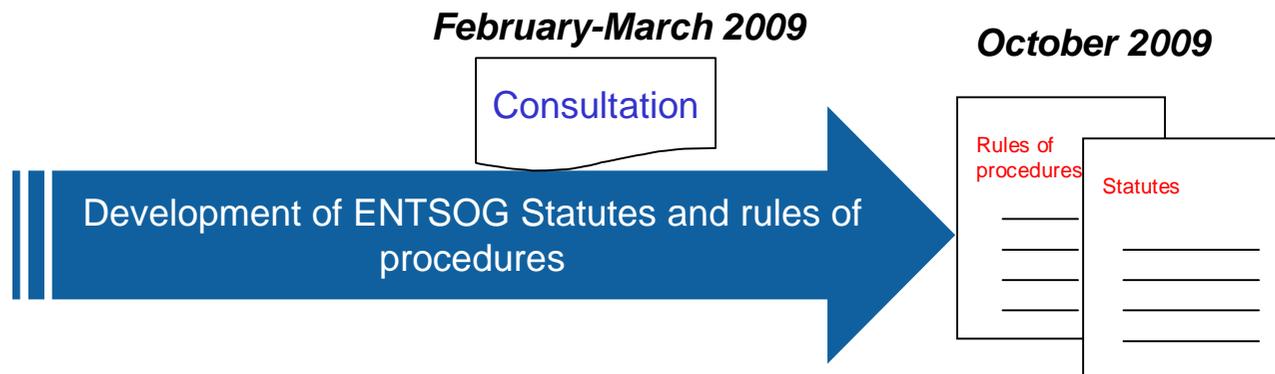

Gas Transmission Europe

# ENTSOG Statutes Development

*To define ENTSOG organisation and processes*

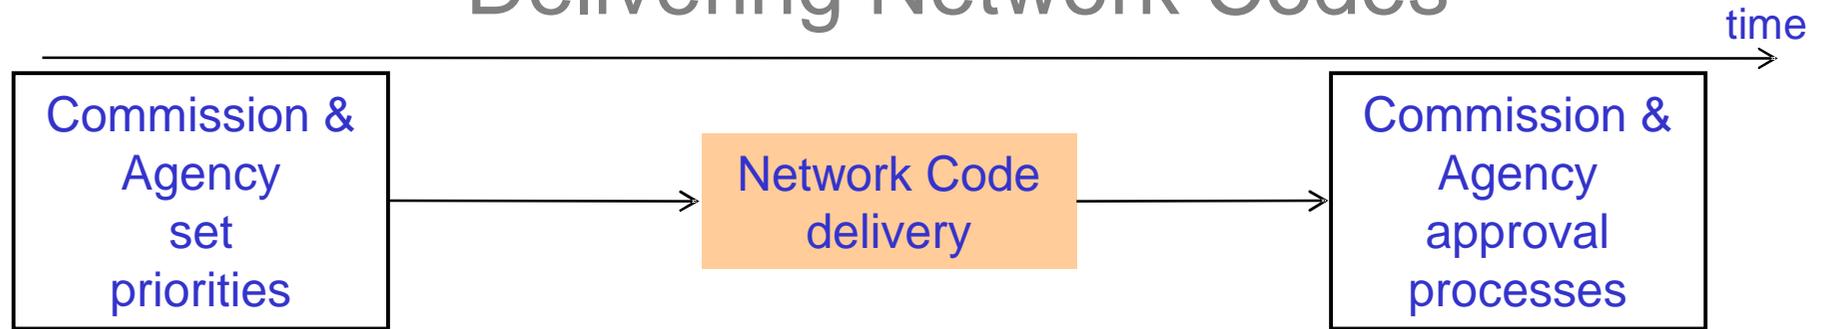

- *Priority is on the development of the consultation and development processes involving all stakeholders and associations*
- *Key elements of the Statutes and Rules of Procedures*

Gas Transmission Europe

# Delivering Network Codes

# Delivering Network Codes

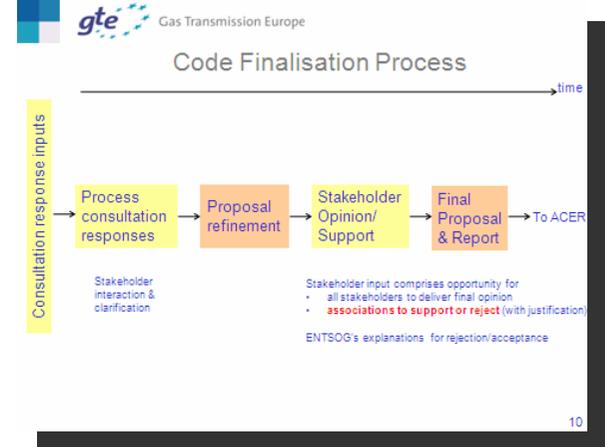

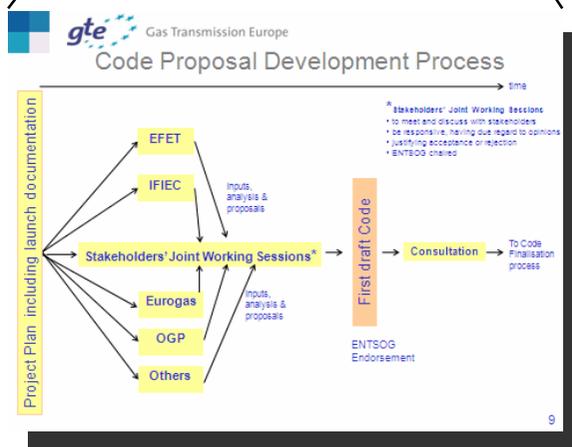

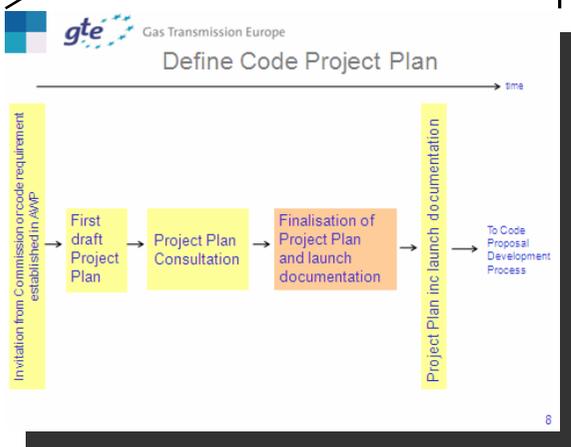

time →

## Define Code Project Plan

## Code Proposal Development

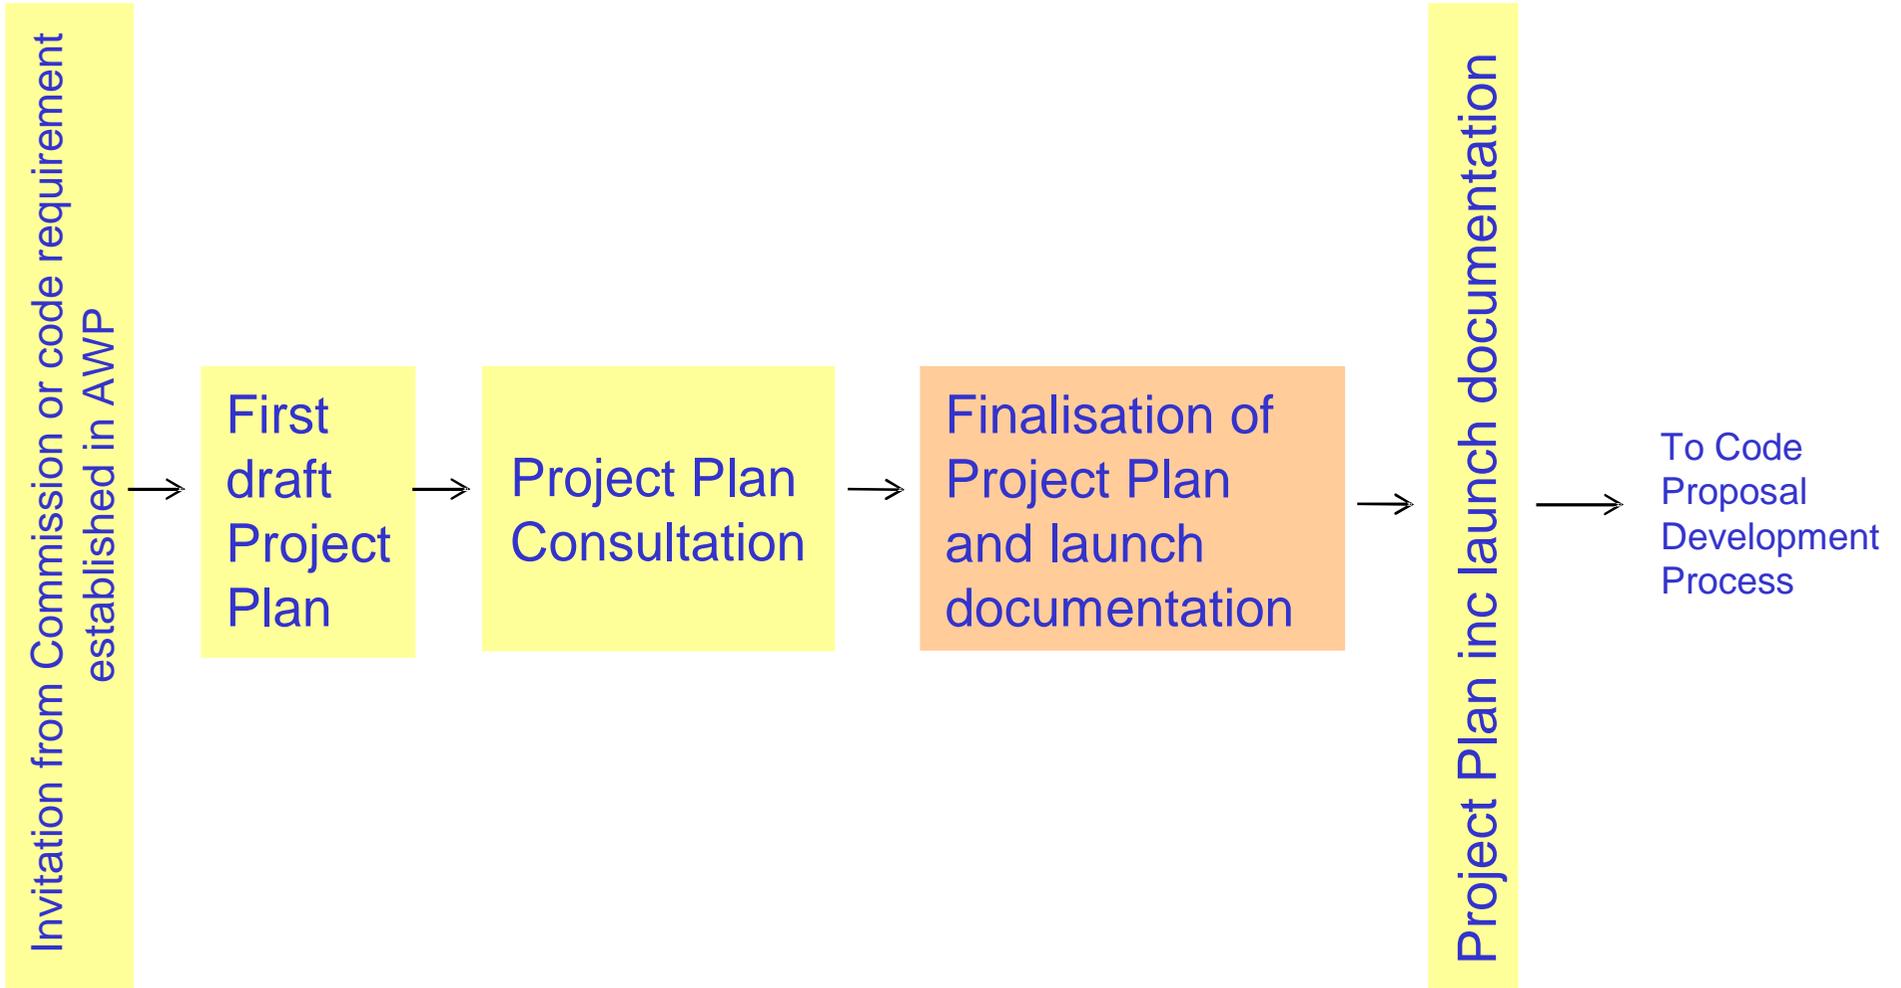

## Code Finalisation

Gas Transmission Europe

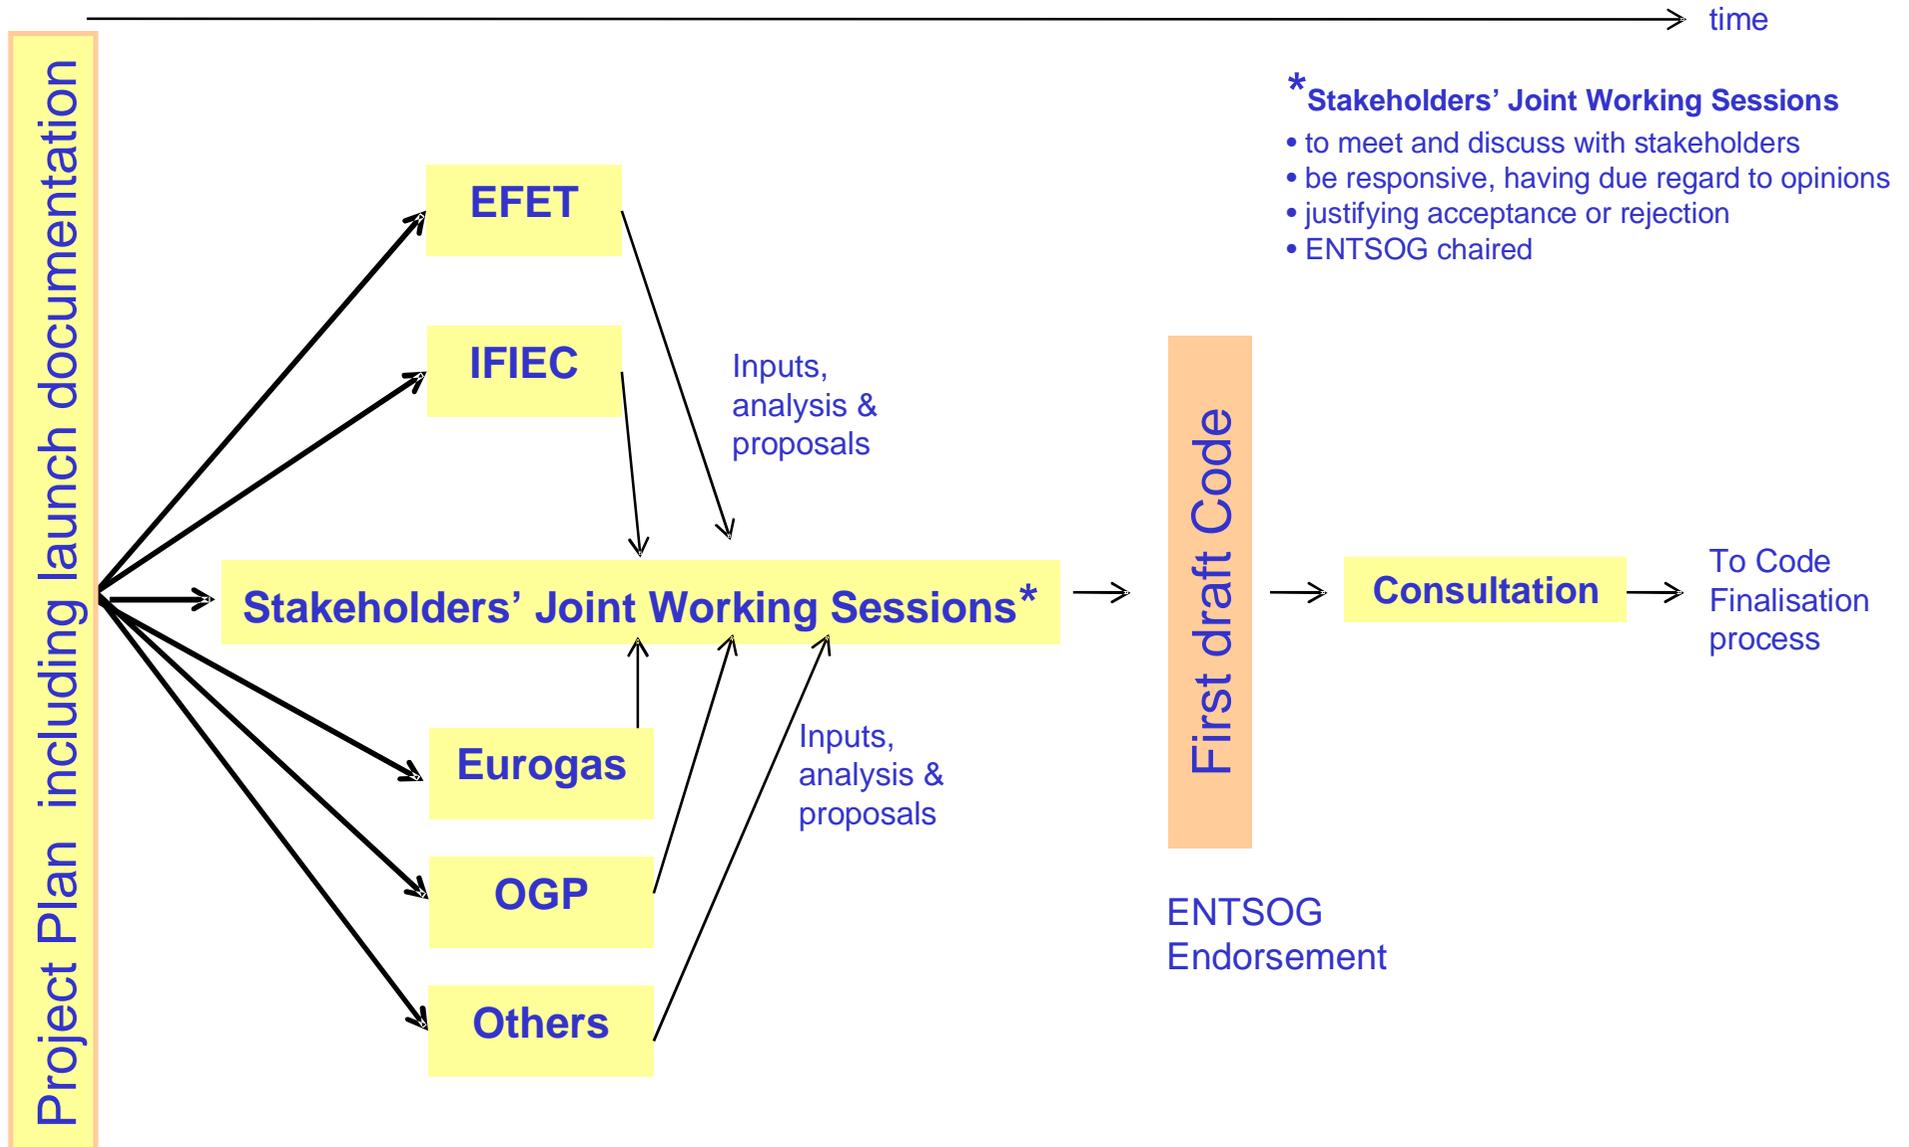

# Define Code Project Plan

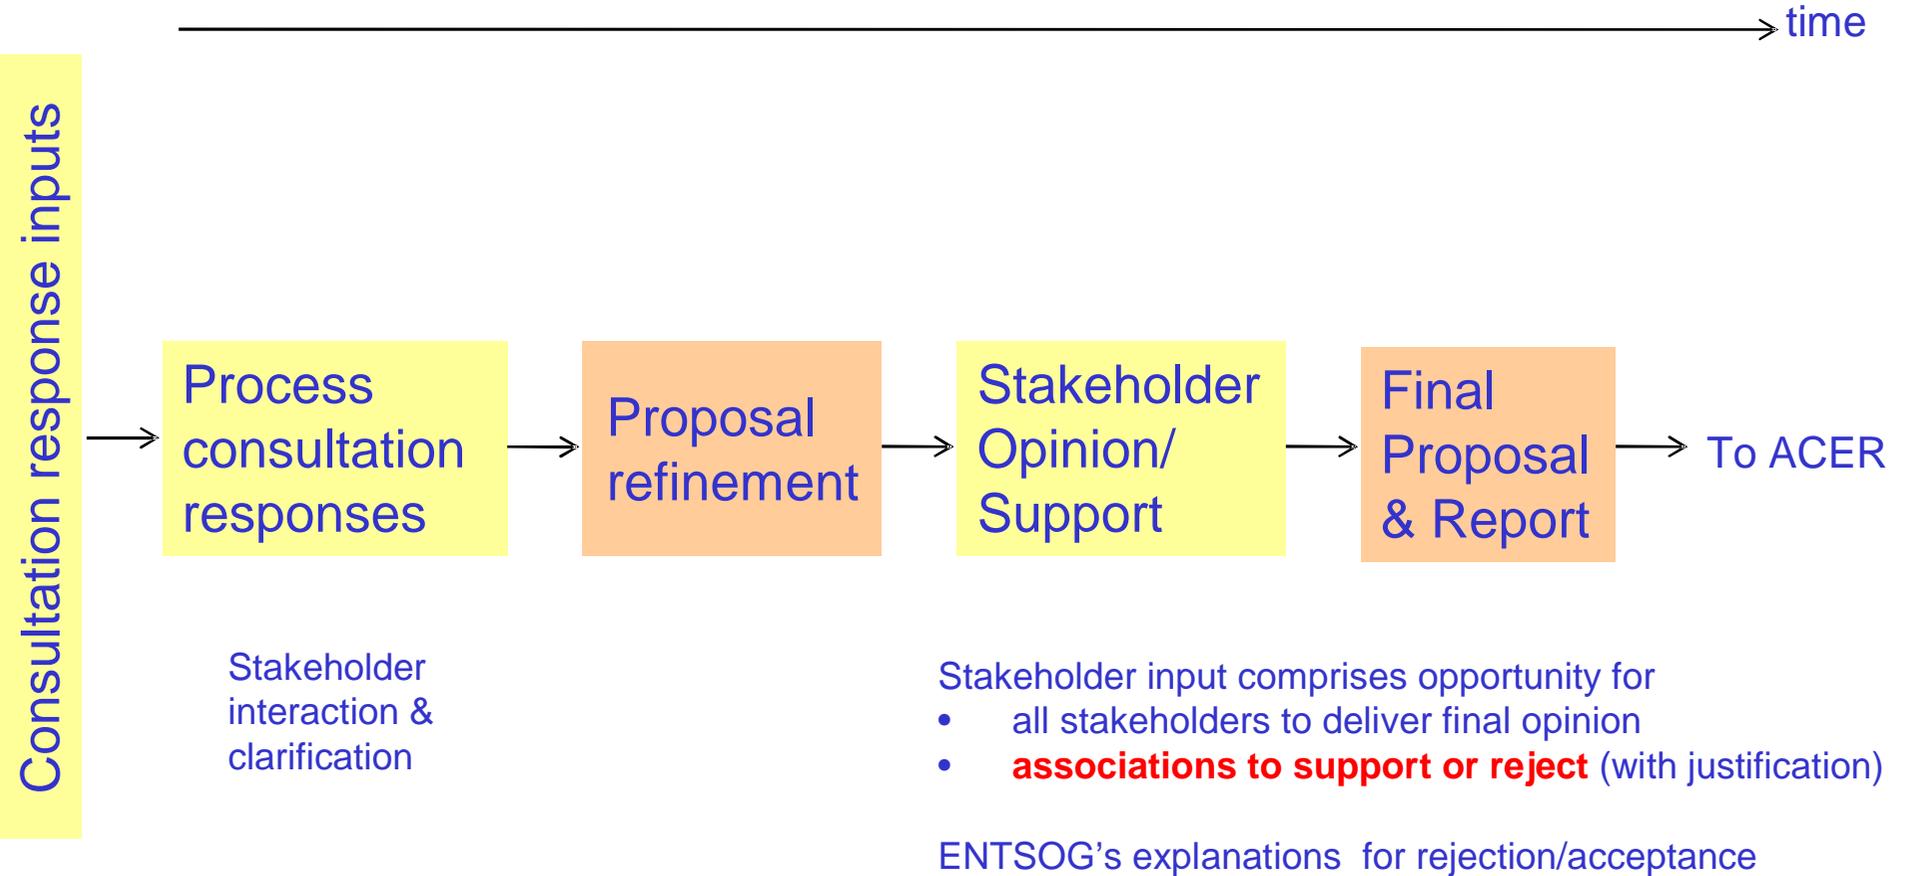

Gas Transmission Europe

# Code Proposal Development Process

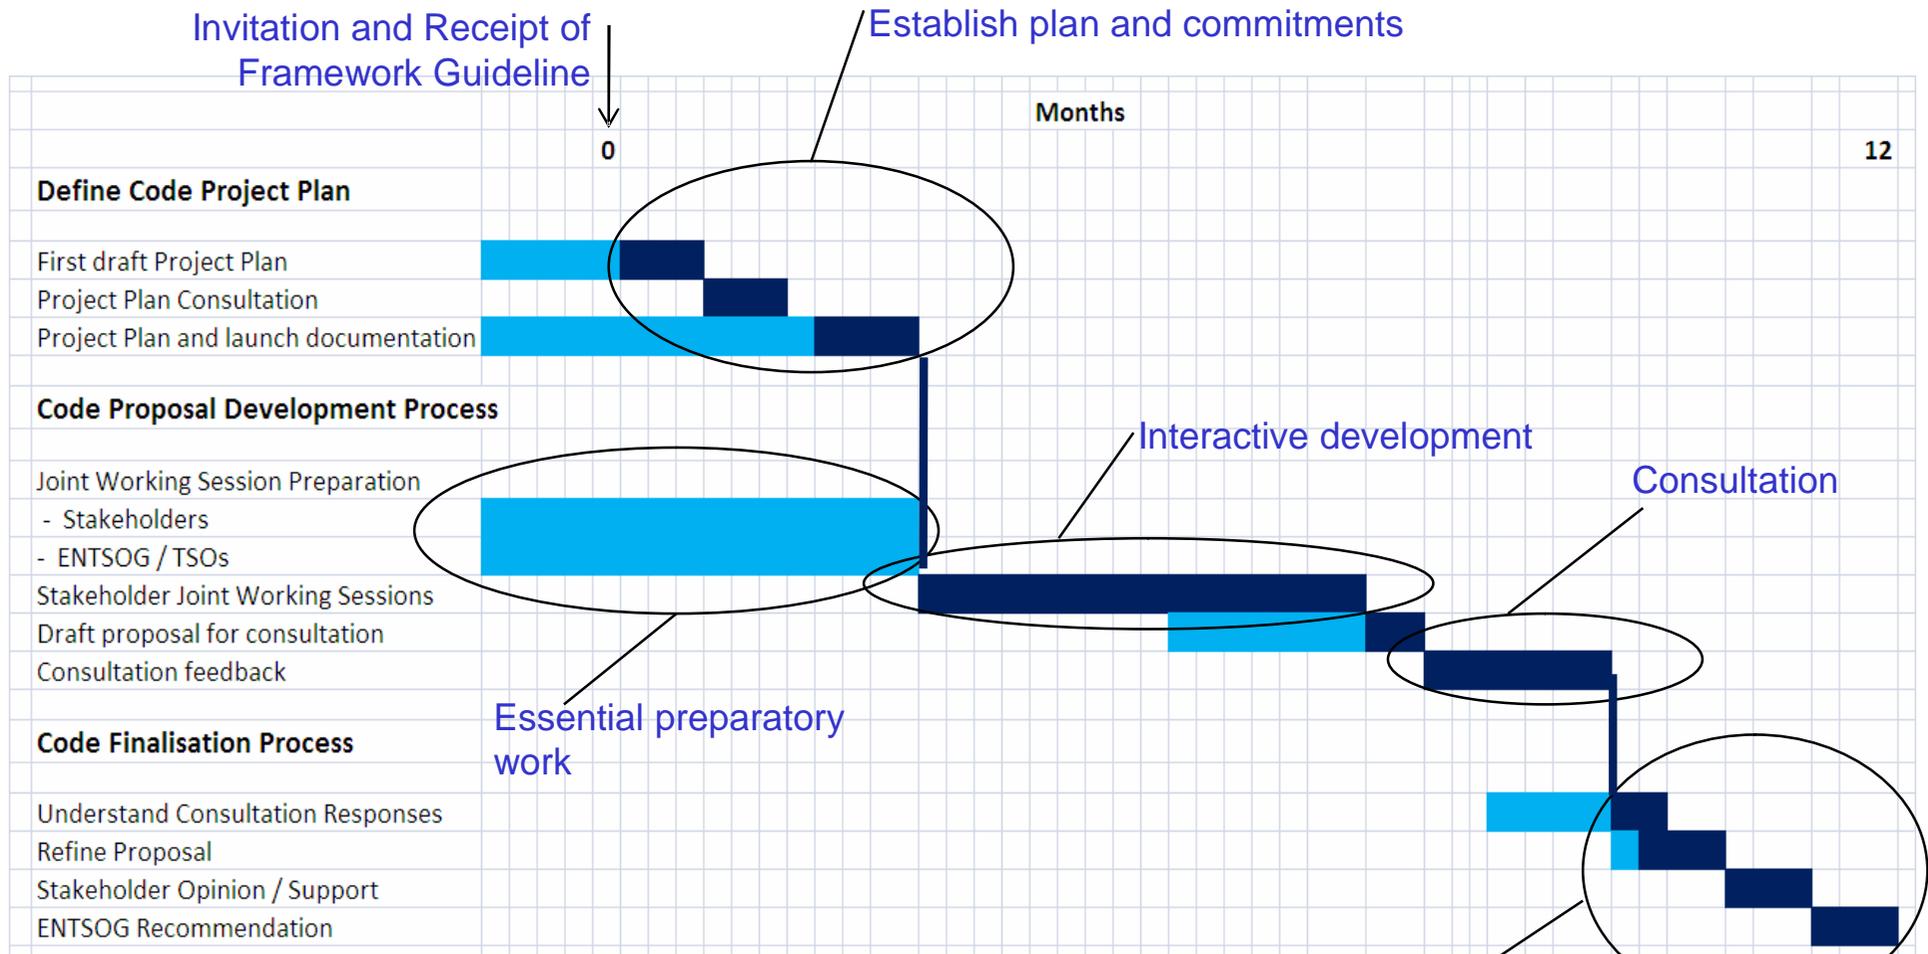

# Code Finalisation Process

# Network Code Development Timeline

Stakeholder and TSO preparatory work and parallel working essential to deliver codes in 12 months

Interaction, refinement & finalisation

## Conclusion

- GTE+ has already started work that is supported by stakeholders → progress on track
- Stakeholder Involvement in the future Code Development Process is essential → working with stakeholders to ensure this is organised
- The Third energy package is required → will provide a better framework ensuring more efficient work of TSOs via ENTSOG

Gas Transmission Europe

# Thank you
