€ 1.4 billion

Increase EIB green lending – projections to 2030

Carbon neutrality – how can we support?

EIB Energy Lending Policy – support to decarbonisation pathways

Unlocking energy efficiency

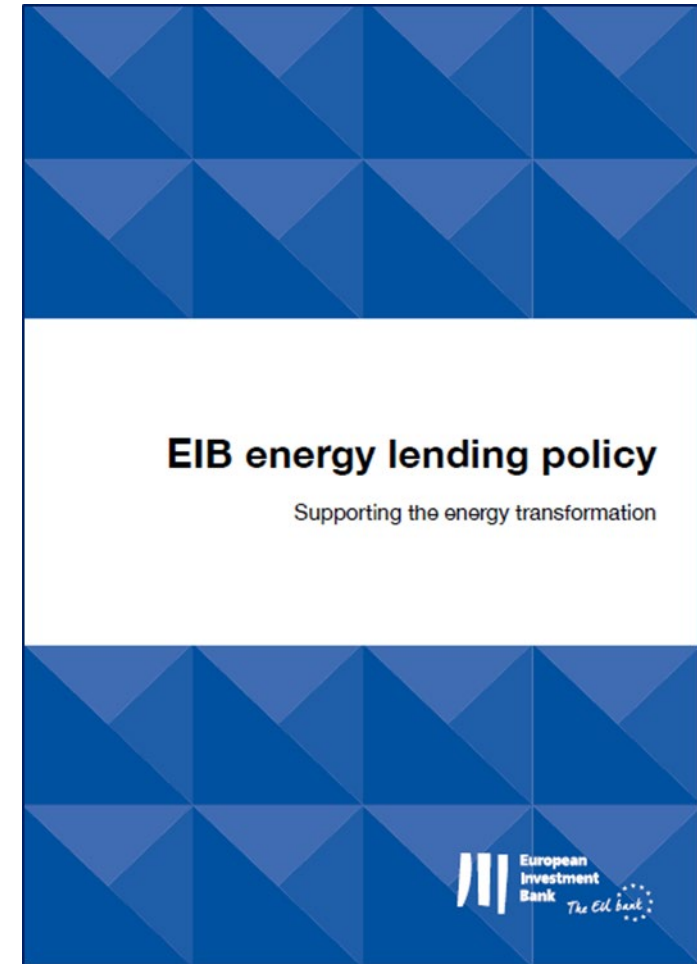

Decarbonising energy supply

Supporting innovative technologies and new types of energy infrastructure

Securing the enabling infrastructure

EIB Energy Lending Policy – European Initiative for Building Renovation EIB -R

Aggregation into portfolios of building renovation projects

Support new ways to attract finance for building rehabilitation

Unlocking new markets : e.g. EE mortgage-based or securitization

EE renovation programmes: cities, housing companies, corporates, funds and financial intermediaries

Linking the financial products with dedicated TA support for project development (ELENA)

EU Green Deal

“To address the twin challenge of energy efficiency and affordability, the EU and the Member States should engage in a **‘renovation wave’ of public and private buildings**”

ELENA- Eligible investment programmes

Energy efficiency

- EE renovations of public and private buildings
- Special focus on EE residential buildings
- Street and traffic lighting
- Integration of renewable energy sources into the buildings
- Investments in district heating/cooling networks

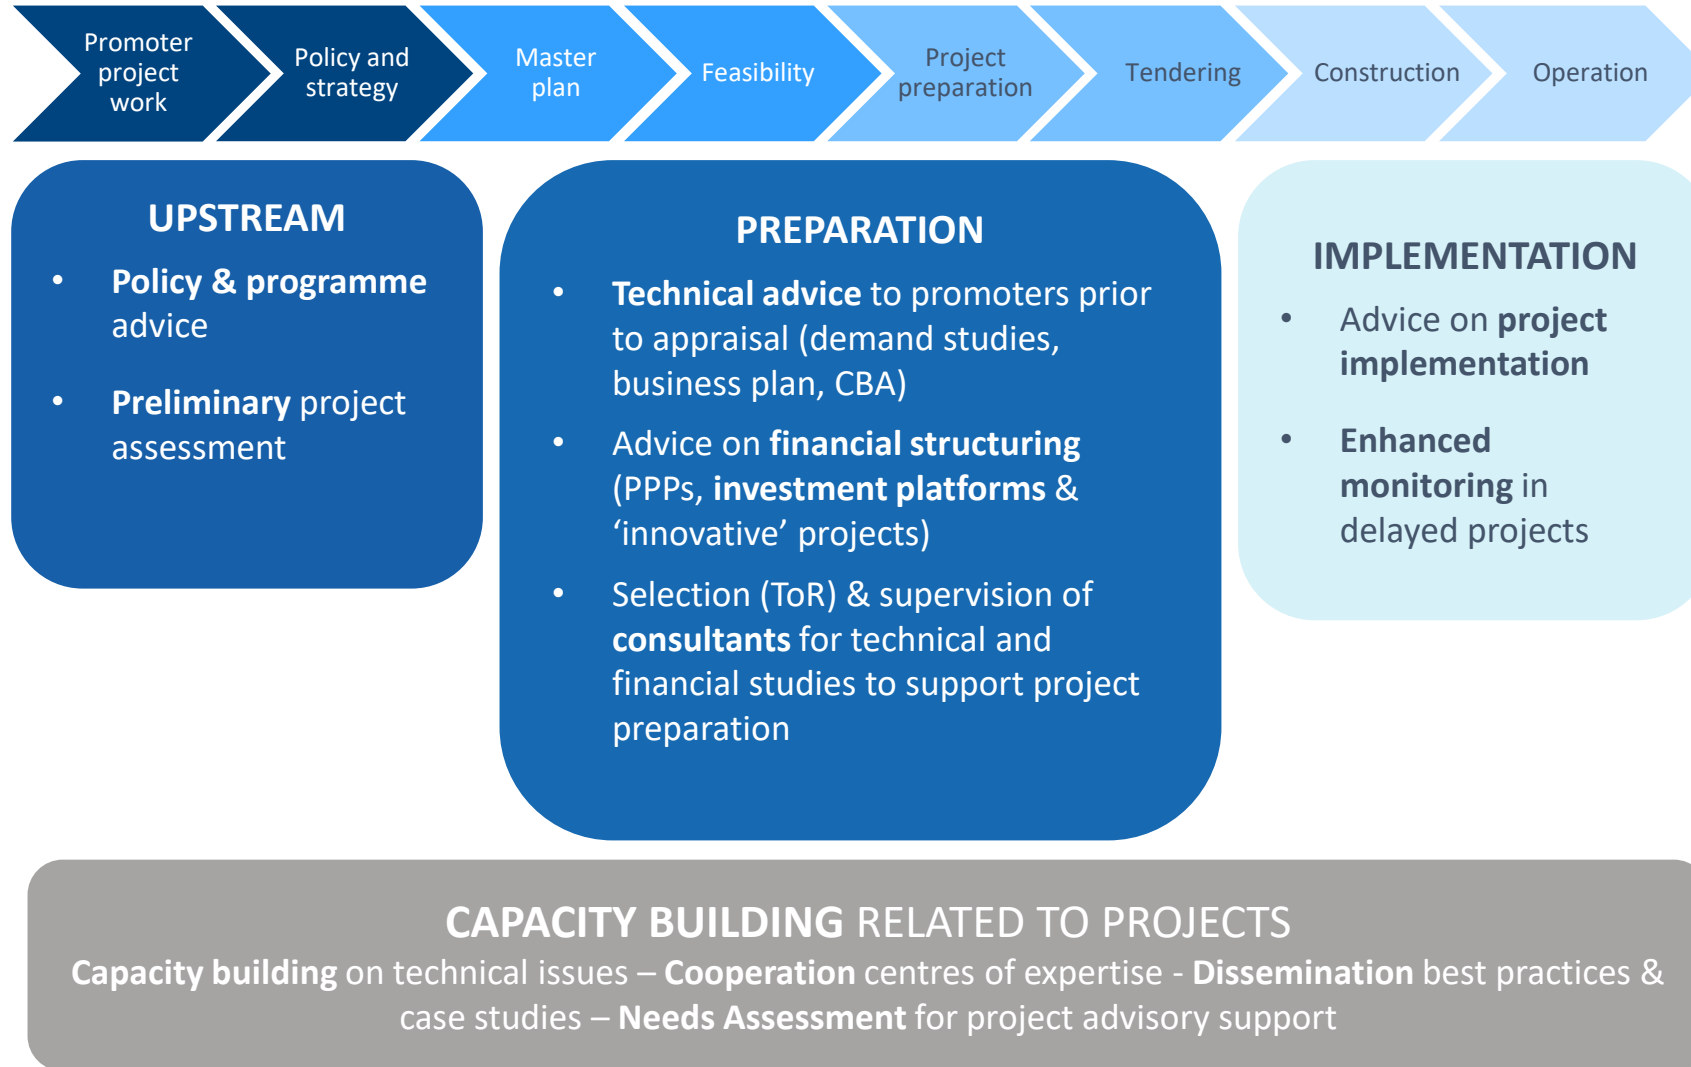

Urban transport and mobility

- Investments to support the use and the integration of innovative solutions going beyond the current state of art for alternative fuels in urban mobility
- Vehicles, recharging infrastructure, energy-efficient measures and systems

Investment programmes implemented
by the final beneficiary or by a third party
