

CEER thoughts on the GSE Transparency Template

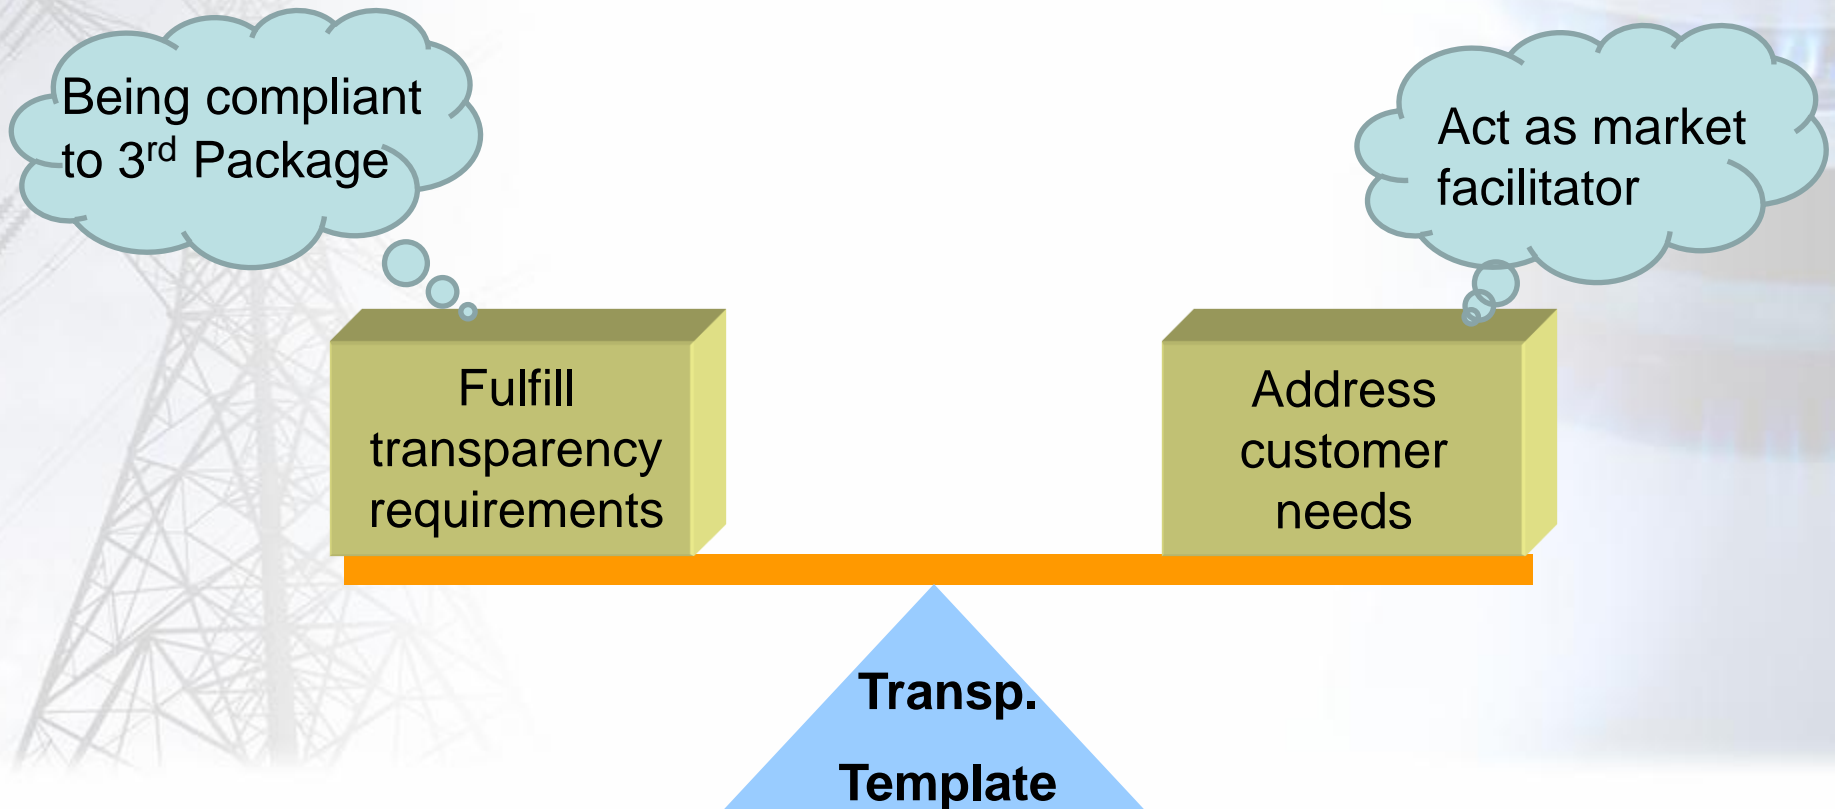

Menno Van Liere

23rd Madrid Forum

17-18 April 2013

General principles and scope

- Transparency is crucial for creating the internal energy market; the template should within reasonable means facilitate the needs of storage customers

Assessment of the Transparency Template

- The Transparency Template meets CEER's expectations

- The Template **can be seen as a *best practice***: It explains how SSOs can fulfill the transparency requirements of the 3rd Package
- The template **seems to be “fit for purpose”**: it meets the needs of storage customers and goes beyond the 3rd Package requirements
- The template ensures that **information is easy accessible**, user friendliness and comparable between storage facilities

Next steps with regard to Transparency

- CEER will monitor to what extent SSOs have implemented the Template

* SSOs should have sufficient implementation time

The background of the slide features a blurred image of a high-voltage electricity pylon on the left and a gas burner with blue flames on the right, set against a blue gradient background.
