TEN-E Regulation – state of play of PCI GIE remarks

- **Selection process of PCIs: complex and not very transparent**
 - Selection process started before the adoption of the regulation.
 - Complex and subjective indicators
-
- **Benefits of the Infrastructure Package: still to be confirmed**
 - CEF amount for energy reduced by the European Council from 9.1 bn € to 5.1 bn €.
 - => Incl. potentially at least 75% for electricity.
 - Other expected benefits: permit granting.

Thank you for your attention.
