

- OGP supports the work done by ACER and ENTSOG on the development of Network Code on Gas Balancing
- Concept of daily balancing and end-of-day settlement creates standard balancing product which can be traded across borders
  - TSOs to prioritise use of within-day market promotes liquidity
  - Where WDOs are needed, they should meet strict criteria
- OGP supports the resubmitted Balancing Network Code and recommend its adoption through comitology with no changes
