

## Review of progress towards the 2020 energy

### INFORMATION ABOUT YOU

Are you responding to this questionnaire on behalf of/as:

Please enter your name or the name of your company/organisation:

Please indicate your principal country or countries of residence or activity:

How would you prefer your contribution to be published on the Commission website, if at all?

### A. Energy efficiency targets

1. Do you think the right approach in addressing the shortfall is:

1.a.1. How should these target(s) be expressed?

1.a.2. At what level should they apply?

1.a.3. Should they be:

Further comments on targets

### B. Energy efficiency measures

2. Do you think that further policy measures are needed at EU level to foster energy efficiency in buildings?

3. Do you think that further policy measures are needed at EU level to foster energy efficiency in industry?

Please give details.

4. Do you think that further policy measures are needed at EU level to foster energy efficiency in transport?

Please give details.

5. Do you think that further policy measures are needed at EU level to foster energy efficiency in electrical equipment?

6. Do you think that further policy measures are needed at EU level to foster energy efficiency in generation and distribution?

---

Please give details.

---

7. Do you think that further financial mechanisms and instruments are needed at EU level to mobilise energy efficiency investments?

---

Please give details.

---

8. Do you think that further measures are needed to build the capacity of actors in the energy efficiency sector?

---

9. What are the most promising technology solutions that can help deliver energy savings in the 2020 and 2030 time horizon? How can their development and uptake be supported at EU level?

---

10. Further comments

---

Please give details.

---

## Energy efficiency objective and a 2030 energy

THE RESPONDENTS
Company
Germany
Anonymously (I consent to publication of all information in my contribution and I declare that none of it is under copyright restrictions that prevent publication)

Energy targets and measures
a) To define energy efficiency target(s)
As a hybrid of the two represents a better benchmark upon which to frame a 2030 objective
EU Sectoral
Indicative
There should be targets for energy saving for the industry. A combination of energy efficiency and saving is the best way.

Yes

Energy saving by renewable energy

To identify and establish the best and most sustainable solutions for the industry and the energy market more communication is necessary. More information are needed.
