

Dear Ladies and Gentlemen from ENER CCS-COMMUNICATION green paper 2030

Marktrewitz, Germany, 26-06-2013.

Please take into account in your communication as my formal submission and please put on your relevant website:

Nobody was able to communicate in ENER CCS-COMMUNICATION green paper 2030 because nobody knew anything about your public participating.

Personally I was informed in the last few moments via Martina Haase, NGO from Aachen in Germany, who was informed in the last few moments from NGO BBU.

Patricia Lorenz from Friends of the Earth found the right words for the Gentlemen from ENER on Aarhus Meeting in EU Commission in Luxemburg (12/13 March 2013): "Only 17 persons know how to take part in your communications. And 5 of them are here in this room". Thank you for these words, Patricia.

1. I reject your green paper 2030 because public participating was not possible in time.
2. I demand from ENER to use the best practice guidance of UN Aarhus Convention for public participating in your communications.

Best regards,

Brigitte Artmann
