To: CLIMA ENERGY GREEN PAPER 2030

Subject: semi green energy in Poland!

Pls push polish government to decrease factor for co-firing : wood & coal. If they prolong factor „1” it means that Poland will become leader of Green Energy in Europe but Real Green Energy never Get UE grants for biogas plants, wind farm, PV farm because government's Energy sector capture all funds with no chance for developing Real Green Energy in Poland. Investor in Network of small biogas plants in Poland-still waiting for legislation rule.
