

# ETSOVista Update

Florence Forum  
September 2007

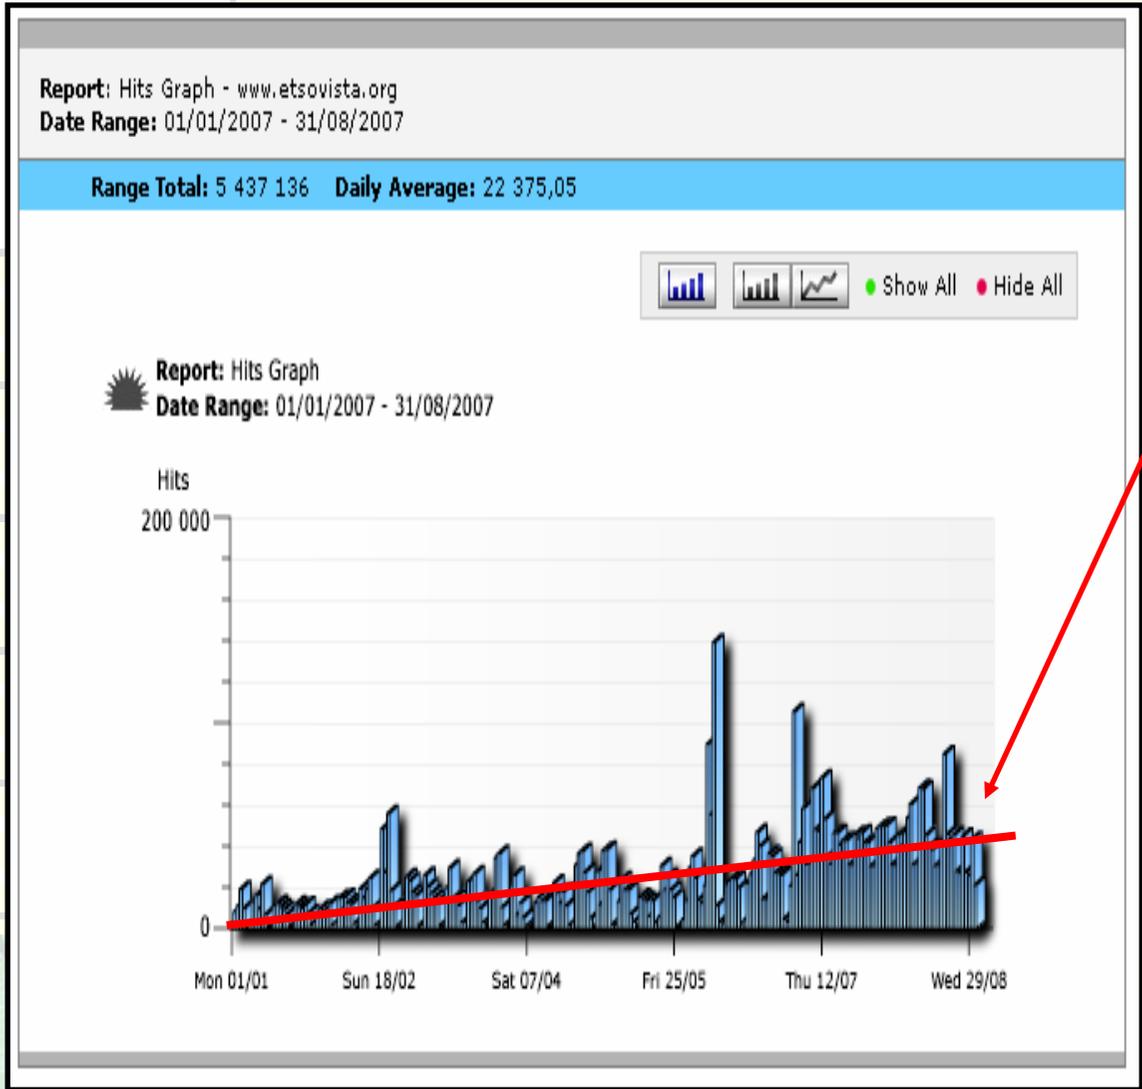

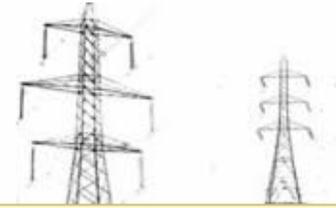

- **ETSO's goal with ETSOVista was to:**
  - **Establish a European data platform**
  - **Facilitate improved access to key market data**
  - **Provide a service to market participants**
- **ETSOVista builds on and compliments individual TSO websites**
- **Access is free of charge to anyone with a legitimate interest in the electricity markets of Europe**
- **Register @ [www.ETSOVista.org](http://www.ETSOVista.org)**

## ETSOVista Today:

- Phase 1 of the project is complete
- 25 TSOs from 19 countries contribute live data every hour
- **Operational Data:**
  - Cross border physical energy flows at H+1
  - Day Ahead and Final cross border exchange schedules
- **Congestion Management Data:**
  - Cross border capacity auction data (prices and volumes)
  - Access Rules, Methodologies and other documents

- Average Weekday Hit Rate for ETSOVista is now over **40,000** per day
- Usage trend has been constantly rising since the beginning of 2007
- Number of registered Users active in the last 6 months is 1,350
- Wide spectrum of Users
  - Energy Market Participants
  - Trade Associations
  - General Public
  - Regulators and EC

All data correct as at 12<sup>th</sup> September 2007

## Where next:

- Phase 2 of the project is underway
- New releases planned for end of 2007 and Spring 2008
- More data from TSOs
  - Day Ahead NTC
  - Network availability and outage data
  - Actual and forecast vertical system load data
  - High level balancing data
- Development of common standards for third party data supply and publication and data provision agreements
- ETSO welcomes the opportunity to provide a central platform for:
  - Generators, Distributors, Market Operators and PEXs

- TSOs are well placed to facilitate increased Transparency in the market via the **ETSOVista** platform
- **ETSOVista** is offered by ETSO as the means of achieving a level playing field for access to key electricity market data for all market participants
- **Access to:**
  - The right information, at the right time and within the right framework...will maximise opportunity for participants and allow TSOs to manage networks more efficiently
- All market participants have responsibility to manage and supply information for the market
