

# 13<sup>th</sup> Meeting of Florence Forum

## “Congestion management guidelines”

**Matti Supponen**  
**DG Energy and Transport**

Directorate-General for Energy and Transport

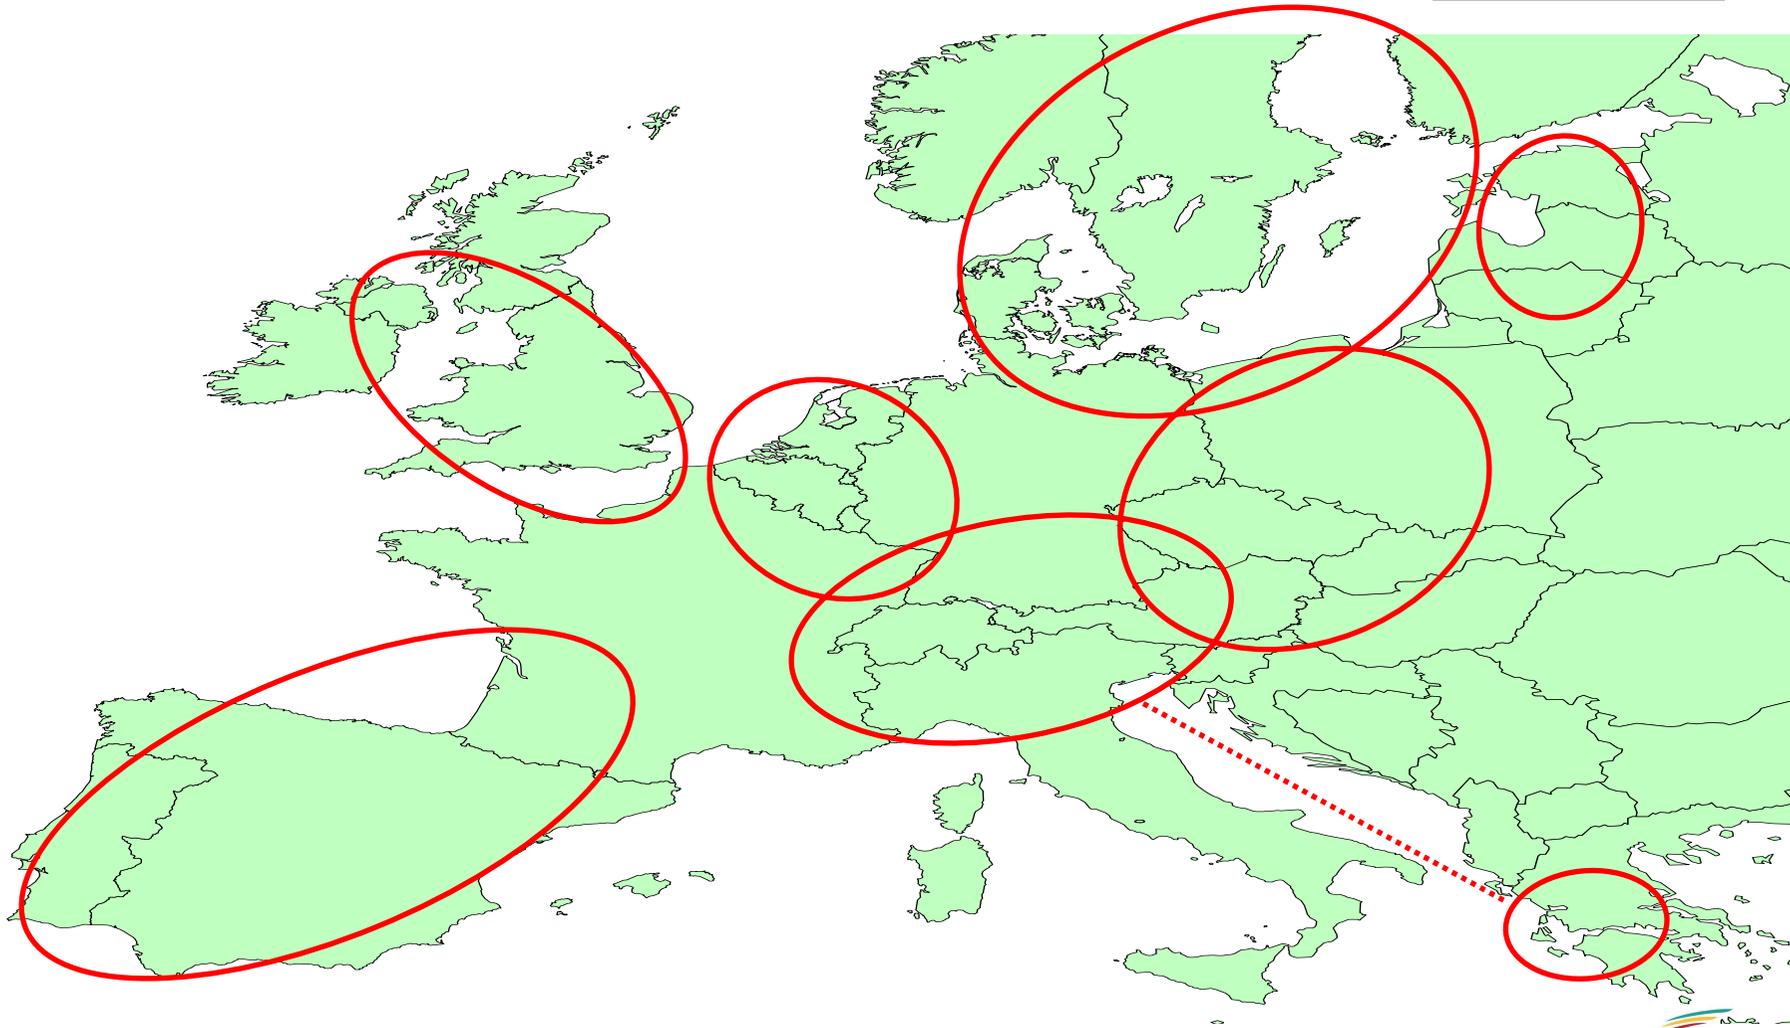

# Process

- **Cross-border electricity committee gave a positive opinion on the guidelines in June 2006**
- **European Parliament has the scrutiny right until 28 September 2006**
- **Commission will proceed to adopting the guidelines immediately after the EP scrutiny ends**
- **Entry into force when published**

# Regional approach

Directorate-General for Energy and Transport

# Common method required

**From 1 January 2007:**

- **Common network model, flow based**
- **Common market based allocation system**
- **Common products (conditions, timeframes etc.)**

# Implementation

- **Priority in Electricity Regional Initiatives**
- **Monitoring and enforcement by the Regulators and ERGEG**
- **Guidelines are directly applicable law**
- **Commission is ready to start infringement procedures if needed**

# Guidelines to be operational

- **Work done in the Electricity Regional Initiatives**
- **Shall be reflected in detailed operational rules like capacity allocation and system operation rules**
- **ETSO transparency platform**

# Cross border intra-day trade

- **Already happens at some borders (for example Nordic countries, French borders, Germany-Austria)**
- **Will be an obligation in 2008**
- **Is expected to improve competition in balancing markets**

# Transparency

- **Market information**
  - load forecasts
  - interconnections and cross-border trade
  - information on generation plants
- **Information exchange between TSOs**
  - ☒ **Good basis for improved transparency**
  - ☒ **However, details need to be defined**

# Long-term contracts

- **Judgement of the Court of Justice on case C17/03**
- **Some long term priority reservations have already been cancelled, not all**
- **Commission has started infringement procedures against remaining priority reservations**

# Way forward

- **Guidelines are a living document**
- **Interval of updates not fixed, could be (1-2 years?)**
- **Discussion in the context of Green Paper, how they should be developed**
