

ENTSOG's view on next steps for regional co-operation

Madrid Forum XX, 26/27 September 2011

ENTSOE regional co-operation

TSOs to deliver 2011 GRIPs

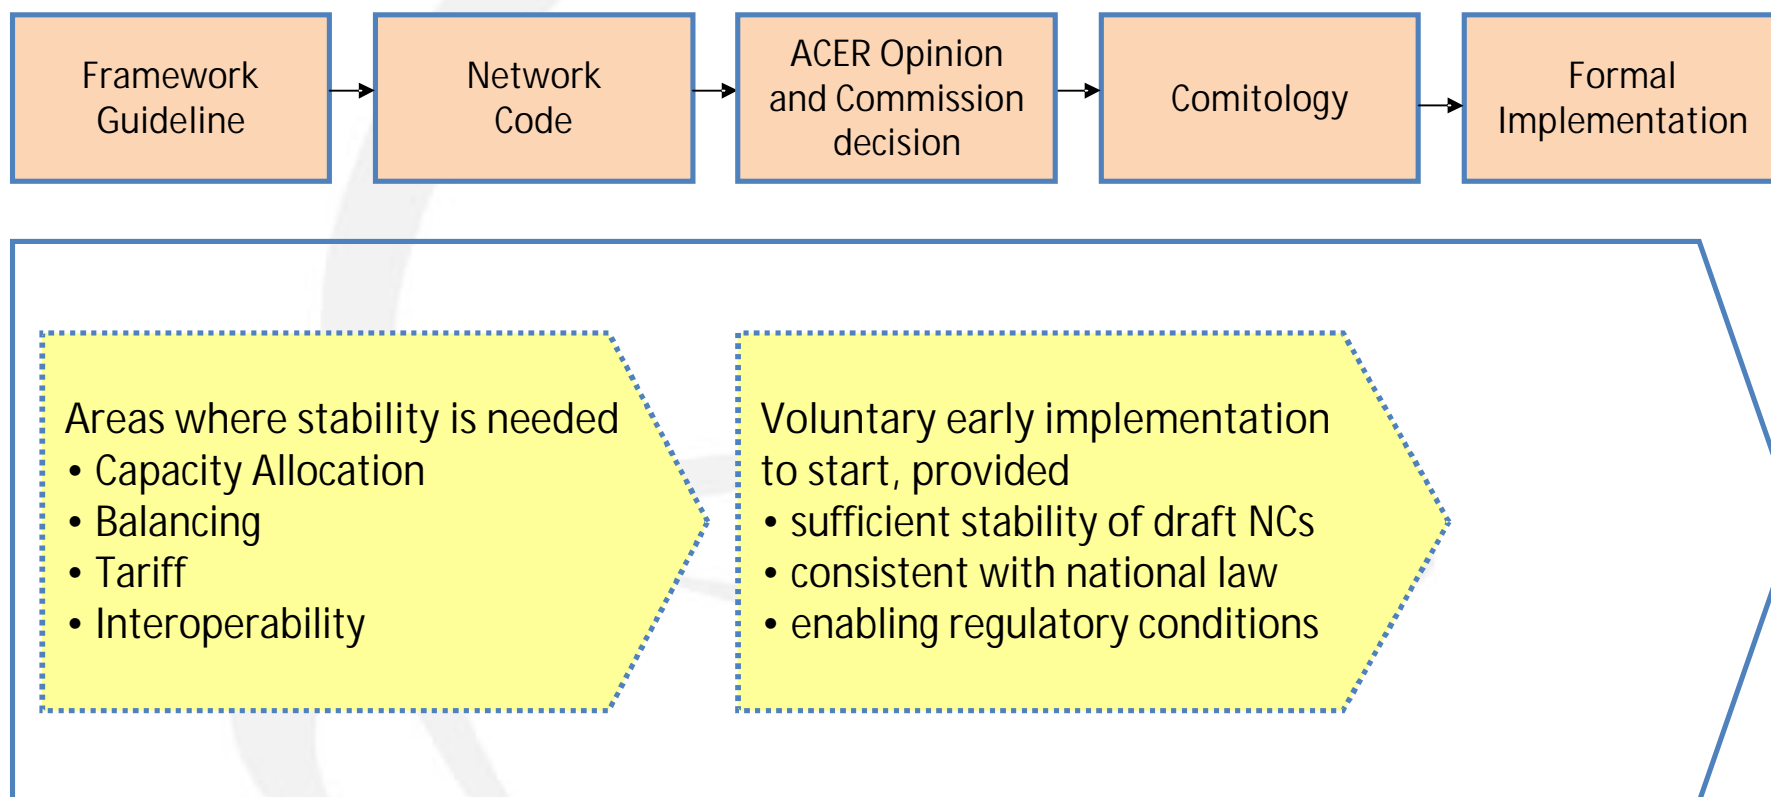

To participate in current regional initiative where progress can be realised

To identify projects for regional work from European processes

To work with Commission / ACER via Planning and Monitoring Group

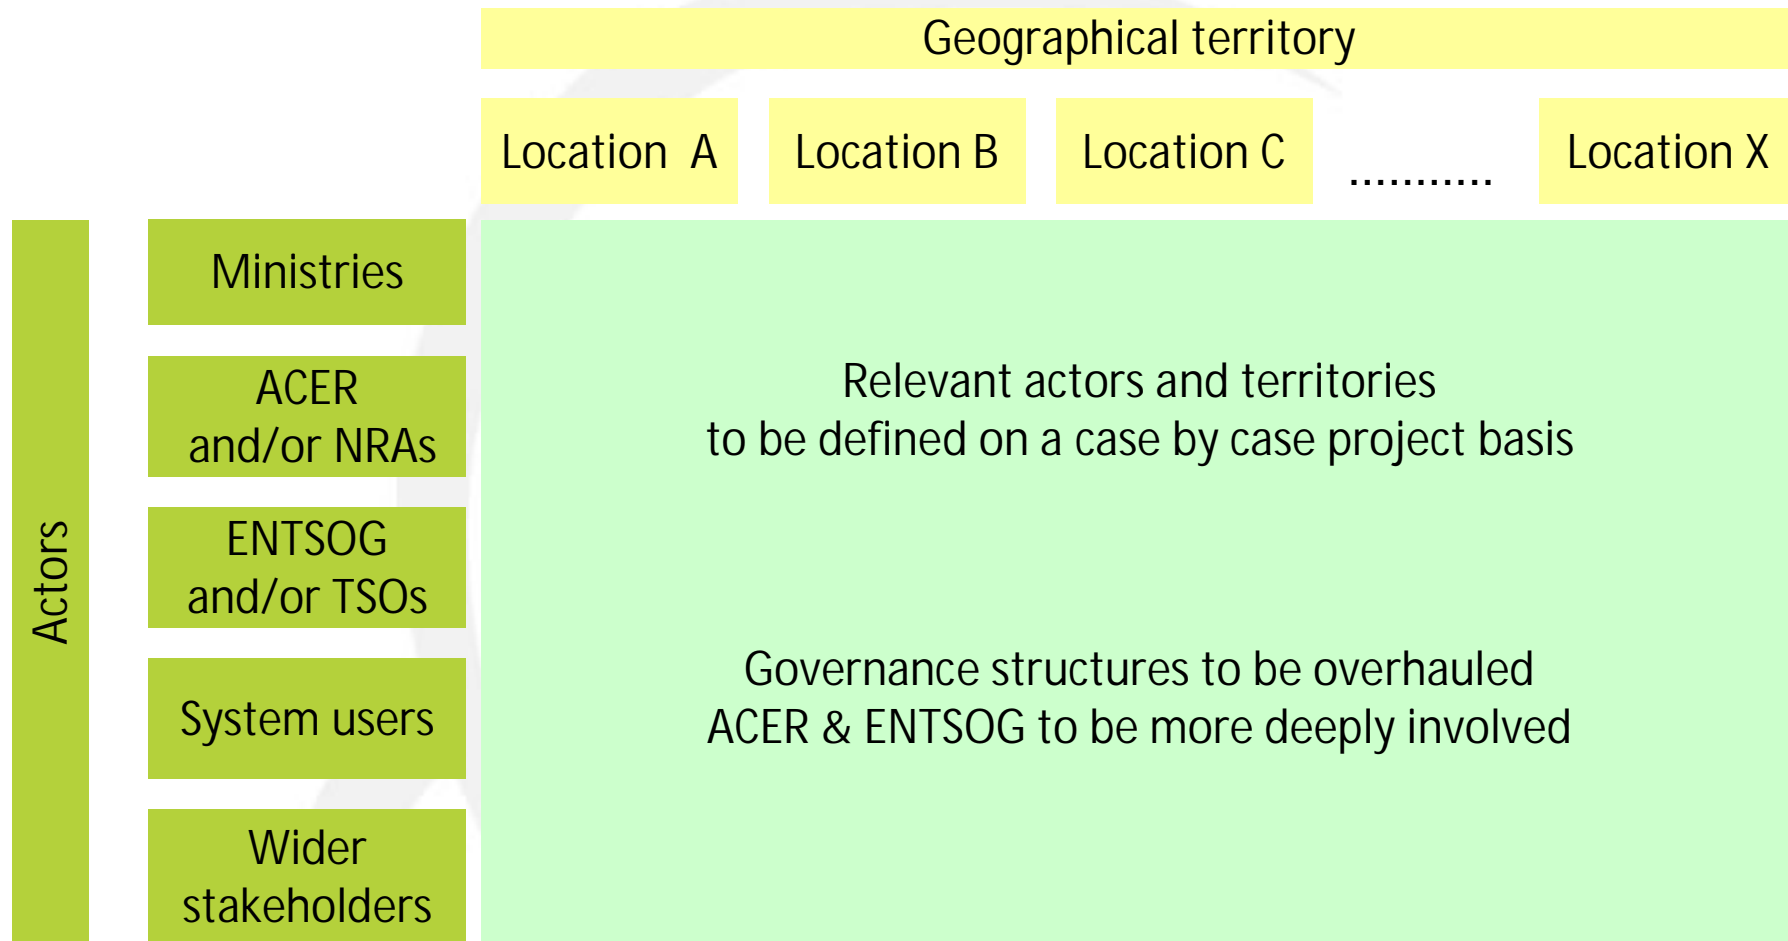

- to ensure alignment of regional projects with European objectives
- to establish governance arrangements

Roadmap to 2014

European processes must be given a chance; regional projects will follow

Regional Projects Participation and Governance

... regional activity to be consistent with Three Year Plan

Conclusions

Delivery of progress needs to be consistent with European 3 Year plan

- ACER and ENTSOG opportunity to contribute their projects

Future regional co-operation should focus on:

- Leaving room for flexibility/communication to cover geographical and relevant actor considerations
- Enabling the implementation of codes
- Ensuring efficiency in the deployment of resources

Need to evolve new Third Package co-ordination structure

- Essential to have shared leadership and delivery responsibility across Member States, ACER, NRAs, ENTSOG and TSOs
