

Producing enough power in average waves AND Storm survival

- Innovative patented solutions
1. Light-weight pretensioned
 2. Wavespring tuning/detuning
 3. Gearbox design

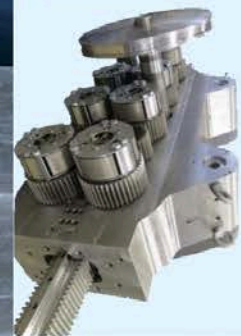

Phase control
5 x energy density

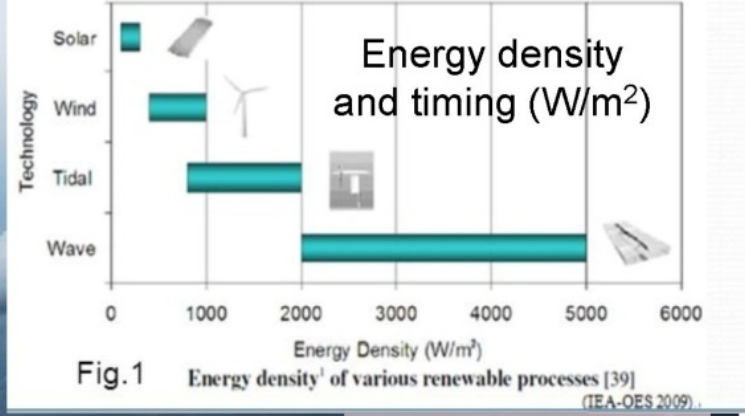

Small & light

Effective install
and O&M

Resonant Wave Energy Converters

DNV-GL
Statement of Feasibility

SURVIVABILITY
Naturally transparent to storm waves

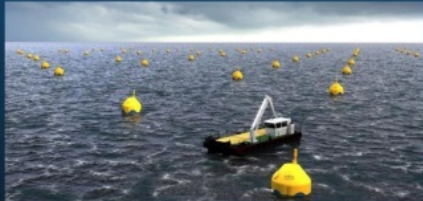

EFFICIENCY
5x Energy output per ton of device

COMPETITIVE
Low capital & operations cost, high average output

GRID BALANCING
Using the ocean as the most effective solar battery on earth
