

SWEDEN

Date of data collection or reference period	Consumer prices on Monday
Reporting body	Swedish Energy Agency
Reporting price discounts on motor fuels	No
Market coverage and data sources	The categories of retailers are Preem and OKQ8. This sample size represents approx. 30 % of Euro Super 95, 20 % of Automotive gasoil, 50 % of heating oil and 50 % of Residual FO for the total consumption. The representativeness will be ensured by starting collecting information from other oil companies as well and include Statoil Fuel & Retail, ST1 Energy. In such case it will cover more than 70 % for all reported petroleum products.
Price averages	Weighted average for Euro Super 95 and Automotive gasoil The price is weighted for EURO-super 95 with 0.15 kr (0.017 Euro) lower price per liter for unmanned station, representing about 25% of total sales. The price is weighted for Automotive gasoil with 0.17 kr (0.019 Euro) lower price per liter for unmanned station, representing about 20% of total sales. Simple average for heating oil and Residual FO.
Biofuels	The percentage of ethanol for EURO-super 95 is 5 volumes percent and for Automotive gasoil the percentage of rapeseed methyl ester (RME) is between 5 - 7 volume percent. For ethanol and low-percentage blend in Euro Super 95, the companies get to deduct the energy tax by 89 percent and carbon dioxide tax by 100 percent. For RME and low-percentage blend in Automotive gasoil, the companies get to deduct the energy tax by 84 percent and carbon dioxide tax by 100 percent. The total tax has been re-calculating for the effective taxation.
Other indirect taxes reported	No indirect taxes reported separately. We will start to separate the product taxes (CO ₂ - and Energy taxes) from other indirect taxes.
Other specific remarks by national administrations	<ul style="list-style-type: none"> If needed, maximum 1 or 2 sentences
