

Electricity Network Codes and Guidelines

Update for Florence Forum

9 October 2015

A reminder of process:

Network codes: adoption phase

What happens when COM receives a NC?

- **Formal/legal issues:**
 - Coherence: other NCs/GL, Reg. 714, etc.
 - Compatibility with EU law
 - Rules clear enough and enforceable?
- **Substance:**
 - Neutrality – balance of all interests?
 - No excessive burden?
 - Appropriate level of harmonization?

Overview

2015

OS, OPS, LFCR		<div>Redrafting and Combining</div>										<div>Committee and Translation</div>	<div>Voted</div>

CACM Guideline

- Positive vote on 5 December 2014
- Formally adopted on 24 July 2015
- Entry into force on 10 August
- First deadlines – definition of Capacity Calculation Regions (mid-Nov) and NEMO designation (mid-Dec)

Forward Capacity Allocation Guideline

- Formally recommended for adoption by ACER.
- Version discussed with Member States summer 2015, and latest version issued 30th Sept.
- Target for committee vote is end-October.

Balancing Guideline

- Recommended for adoption by ACER received in July 2015. Next stage is the Commission Impact Assessment.
- Comitology expected mid-2016.
- Important link with Market Design work.

Requirements for Generators

- Voted June 2015. Updating translations and to shortly enter scrutiny phase.

Demand Connection

- Clarifying text (especially scope of application) following comments from Member States in the Cross-border committee – latest version issued to Member States 30th September for discussion and possible voting on 15th-16th October.

High Voltage Direct Current

- Voted in the Cross-border committee September 2015. Updating translations and to enter scrutiny phase shortly.

System Operation

- Combining OS, OPS and LFCR into one guideline given the synergies between them.
- Combined draft has been prepared; inter-service consultation is being launched. To be presented in Committee in November; to be published in parallel with sending to MS. Aim for voting still in December.
- Emergency and Restoration: ACER recommended adoption for NC E&R in summer 2015. Next stage is Commission Impact Assessment. Not currently considering combining into the System Operation Guideline and do not expect a vote this year. Close links to the security of electricity supply initiative.
