

CEER Work Programme 2012

CEER 2012 WORK PROGRAMME

- **GEODE** welcomes CEER's 2012 Work Programme
- Regulators work on Smart Grids and Smart Meters constitute a priority for **GEODE** since both topics require significant involvement of DSOs
 - √ Of particular interest is CEER's announced work on:
 - the "rethinking the electricity grid through the roll-out of smart meters"
 - "the new unbundling rules for DSOs"

GEODE is also interested in the work proposed on energy infrastructure and on energy efficiency

- Possible additional areas of work could be:
 - √ demand side management from the system operation perspective
 - √ Smart Meters functionalities and tariff design

GEODE confirms its willingness to cooperate with CEER on its work at the earliest opportunity
