

ACER

 Agency for the Cooperation
of Energy Regulators

3.2 Implementation of electricity network codes and guidelines

**ACER Position
Mr Sven Kaiser**

**Florence Forum
3-4 March 2016**

(Legal) processes under way to be established / adapted

- **Transition from early implementation to legally binding phase ongoing**
- **Continuous coordination between:
TSOs (ENTSO) / Regulators (ACER) / NEMOs**
- **Market European Stakeholder Committee established and running, Committee on grid connection under establishment**
- **Proposals and approval processes – establishment of all NRA Forum under consideration**

CACM Implementation - Day-Ahead and Intra-Day

Capacity calculation

TSOs CCR proposal under evaluation – can only be seen as a first step

Build on CWE Flow-Based and expand geographically and to intra-day

MCO plan

Requirements discussed with NEMOs

Governance and cost-related issues of relevance

BZ Review

Ambitious project – But many content issues still unclear (e.g. application of criteria)

NRAs request amendments to configurations, methodology and assumptions

XBID

Project broadly on track and (still) supported

LIP progress and accession stream relevant

**Thank you for
your attention !**
