of Energy Regulators

Ten-Year Network Development Plan - ACER update

Christine Materazzi-Wagner

Co-chair ACER Infrastructure Task Force

22nd Florence Forum

22-23 May 2012

Pilot TYNDP: learning-by-doing

- First TYNDP worked out by ENTSO-E in 2010
- Subsequent Regulators' opinion called for a list of improvements:
 - A top-down scenario approach
 - A more integrated approach
 - Market studies for the interconnectors
 - Cost benefits analysis
 - A better consultation of the stakeholders

2010

TYNDP 2012: ACER acknowledges major improvements

- The introduction of a top-down scenario in line with the 20-20-20 policy
- Market studies to assess the value of developing exchange capacities
- The clustering of projects to highlight the European value of a group of projects
- The introduction of a multi-criteria analysis

2012

TYNDP 2014: Still way to go – Expectations by ACER

- An improved process to better take into account third-party projects
- An increased stakeholders implication
- A fair level of information to stakeholders to fully take advantage of the market studies
- A wider span between scenarios to better encompass possible futures

2014

TYNDP: the starting point for PCI selection

- The TYNDP exercise to streamline the EIP process
- PCI should be a subset of TYNDP
- Consistency between EIP and TYNDP regions
- Consistency of the CBA methodology and selection criteria
