 Agency for the Cooperation
of Energy Regulators

Network Code on CA&CM - ACER update

Marien Alain
Co-chair ACER ENM Task Force

22nd Florence Forum

22-23 May 2012

Process from regulators perspective

- CACM FG completed July 2011
- Regulators are closely following NC drafting process and consultation
- NC for 30 September 2012
- ACER Opinion due end 2012

Preliminary evaluation

- Several requirements of the CACM FG already met ...
 - especially for the day-ahead and intraday sections
- ... but more work is also needed ...
 - Clarify approval issues
 - Include possibility to amend rules, revisit zone issue, etc.
 - Enhance symmetry of requirements on different parties (market players, PXs, TSOs,...)
 - Lack of regional and EU-wide TSO coordination in capacity calculation: too much is left at national level (e.g. reliability margins, generation shift keys, base case,...)
 - Lack of adequate detailed description level (e.g. common capacity calculation,...)

Thank you for your attention!
