Guidelines for Balancing

- ➔ EFET welcomes this consultation and will respond before June 20th
- Europe needs to converge on **market-based balancing** – this is missing from the guidelines.
- Information provisions for market-based balancing is inadequate in the proposed guidelines.
- Where it is not yet practical to implement balancing markets, the charges for balancing services must be based on **efficiently incurred costs**

.../ continued

- There should be a clear **Pan-European objective** to move towards balancing markets, and a recognition that the locally dominant supply companies will have a key role to play to achieve a successful transition.
- The guidelines, rely too heavily on Regulation 1775 and would benefit from **clarification** to avoid mis-interpretation or future interpretation arguments.
- Some **important issues**, albeit detailed, addressed in the previous consultation, ought to be included e.g: ex-post trading and use of linepack information.
