II.1.4) Short description:

The Directorate-General for Energy, Directorate E — Euratom safeguards of the European Commission, acting on the basis of Article 77 of the Treaty Establishing the European Atomic Energy Community (Euratom Treaty), implements nuclear safeguards in the Member States of the European Union.

To ensure that nuclear material is only used as declared, physical verification of nuclear material throughout the nuclear fuel cycle is required. In the course of modernising existing equipment, a number of high purity germanium (HPGe) detectors have to be replaced, which are used in routine operations in on-site laboratories as building blocks of systems carrying out high precision measurements.

In order to cover the needs arising from the inspection activities mentioned above, 8 HPGe detectors which combine electric cooling with liquid nitrogen cooling (hybrid systems), will be purchased in the framework of this contract.
