

ENTSO-E main comments during the EC 2011 consultation

- ü Ensuring efficient implementation,
All parties must have sufficient time to implement the requirements of the future Regulation.
- ü Applicability of provisions to non EU countries
ENTSO-E urges the EC to take appropriate actions to ensure a quick and effective applicability to non-EU countries, especially those whose market conditions impact on the EU.
- ü Ensuring recovery of efficiently incurred costs
- ü Competition aspects,
 - *Striking the right balance between confidentiality and transparency : should data be published aggregated or on an individual basis ?*
 - *Article to foresee cases of exemption or delay of publication (inspired by REMIT approach).*
 - *Compatibility with critical infrastructure protection and national security (Directive 2008/114/EC).*

Domains and information flows of Fundamental Data

Basic rule : data to be published per Market Time Unit and per Bidding Area
Quality of data will rely on stakeholders (generators, consumers, TSOs,...)

The ENTSO-E Transparency Project : 3 anticipated streams

Transparency Stakeholders Advisory Group,
Ø Will be launched as soon as the the Commission Regulation is known,
Ø Aims at writing European definitions of data to be published,
Ø Presentation of the IT technical documentation

Internal IT Project,
Ø Selection of an IT vendor by European Call For Tender (for end of Q1 2012),
Ø Elaboration of the technical documents (Business Requirement Specifications and Implementation Guides)

Regional projects, information flows from primary owners

ACER
approval of the
ENTSO-E
project to be
obtained
(2012)
