

Energy Infrastructure Package and infrastructure financing

INFRASTRUCTURE PACKAGE

- **GEODE** welcomes EC Regulation including Smart Grids projects **at distribution level** in the energy infrastructure categories to be considered as energy infrastructure priorities
- However the criteria set down on Smart Grids projects are too narrow
 - ✓ Smart Grids are vital in delivering a low carbon energy economy
 - All kind of projects small, medium and large scale should be supported
 - A wider list of criteria should be included
- LV networks should be included in the scope of the Regulation and not only MV
 - ✓ many smart grid challenges will manifest themselves on LV distribution networks (for example: electric vehicles, heat pumps and PV generation)
