

Network Code on Capacity Calculation and Congestion Management

**Florence Forum
5-6 December 2011**

CACM Network Code – The challenge

Write a single document setting out the European 'Target Model'

Ensure that document is clear, accessible and meets the FWGL

Consult widely and ensure a range of views are heard and reflected.

Complete development and consultation by the end of September 2012.

CACM Network Code - Scope

Forward markets

- To be tackled at a later stage.
- Important interaction with CACM.

Capacity Calculation

- Within the CACM code

Day Ahead Markets

- Within the CACM code

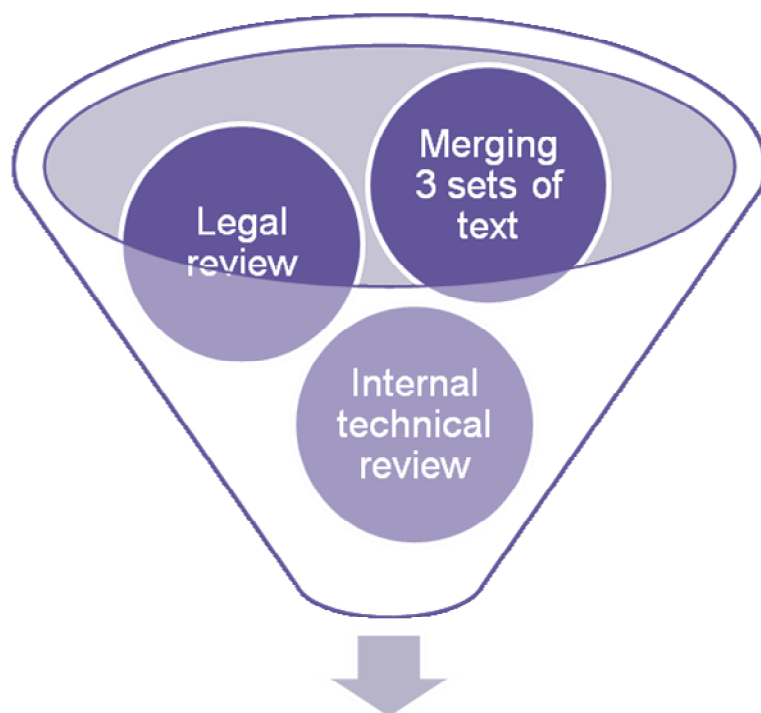

Intra-day Markets

- Within the CACM code

Balancing

- Subject of a separate code.
- Scoping work underway.

CACM Network Code – State of play

A single code for consultation

Three drafting teams working on 3 technical sections.

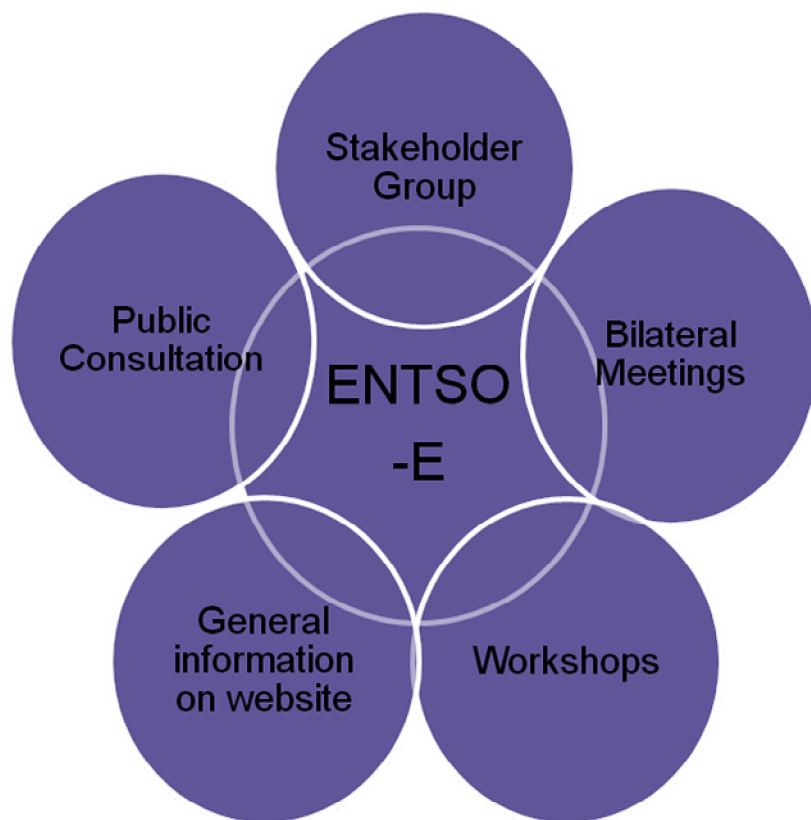

To be merged, aligned and completed by transversal issues (definitions, firmness, ...).

And dealing with interactions with other areas and codes (e.g. System Operations).

Including informal comments from stakeholders.

Ahead of a formal consultation.

CACM Network Code – Stakeholder Engagement

Stakeholder Group established in August 2011.

Will meet throughout process of developing codes.

Open workshops planned before and during public consultation.

Bilateral meetings with key stakeholders ongoing.

Information is available via entsoe.eu
