**COMMISSION OPINION**

**of 5.10.2015**

**under Regulation (EU) No 994/2010 on the Preventive Action Plan and Emergency Plan  
submitted by the Competent Authority of the Republic of Finland to the European  
Commission**

## COMMISSION OPINION

of 5.10.2015

### **under Regulation (EU) No 994/2010 on the Preventive Action Plan and Emergency Plan submitted by the Competent Authority of the Republic of Finland to the European Commission**

#### **1. PROCEDURE**

Article 4(1) of Regulation (EU) No 994/2010 ("Regulation") requires the Competent Authority of each Member State to establish a Preventive Action Plan ("PAP") and an Emergency Plan ("EP", together: "Contingency Plans"). In accordance with Article 5(4) and Article 10(2) of the Regulation, the Contingency Plans have to be updated every two years, unless circumstances require more frequent updates.

The Contingency Plans (as well as their updates) need to be based on the national Risk Assessment which each Competent Authority has to adopt and notify to the Commission before the adoption of the Contingency Plans pursuant to Article 9 of the Regulation. The Risk Assessment should make a full assessment of the risks affecting the security of gas supply in the Member State on the basis of the common elements which include, inter alia, running various scenarios of exceptionally high gas demand and supply disruption. The Risk Assessment has to be updated for the first time at the latest 18 months after the adoption of the Contingency Plans.

The Competent Authority of Finland, the National Emergency Supply Agency, has notified its updated Risk Assessment pursuant to Article 9 of the Regulation to the Commission on 3 June 2014.

The National Emergency Supply Agency notified to the Commission on 2 December 2014 its updated Preventive Action Plan and Emergency Plan.

The Commission considers it appropriate to communicate any comments on the updated Contingency Plans by using the same procedure and applying the same assessment criteria as set out in Article 4(6) of the Regulation in respect of the initial Contingency Plans.

Thus having assessed the Contingency Plans, as updated, in view of the criteria mentioned in Article 4(6)(b)(i) to (iii) of the Regulation, and having reported its main findings to the Gas Coordination Group on 28 January 2015 and 4 May 2015, the Commission notes as follows.

#### **2. ASSESSMENT AND CONCLUSION**

Based on the analysis of the Contingency Plans, the Commission concludes that they comply with the provisions of the Regulation, in light of the criteria in Article 4(6)(b) therein.

Therefore, the Commission has decided not to request amendments to the Finnish Contingency Plans as foreseen in Article 4(6)(b) of the Regulation.

The Commission reminds Finland that if any of the investments in future infrastructure, LNG terminal storage or interconnector involves State resources they could constitute State aid within the meaning of Article 107(1) TFEU (if the other conditions therein are also met) and

must be notified to the Commission under Article 108(3) TFEU unless they are caught by the General Block Exemption Regulation<sup>1</sup>.

The Commission's assessment expressed in this opinion is without prejudice to any position it may take *vis-à-vis* Finland as regards compatibility of national measures with EU law, including in the context of infringement proceedings.

The Commission will publish this opinion. The Commission does not consider the information contained herein to be confidential, in particular as it relates to documents which are publicly available. The Finnish National Emergency Supply Agency is invited to inform the Commission within five working days following receipt of the opinion whether it considers that it contains commercially sensitive information, the confidentiality of which is to be preserved.
