**Paolo Mosa**  
**GTE Vice-President**  
**Chairman of the GTE Transparency WG**

Gas Transmission Europe

## ***Table of contents***

---

- Background
- General findings
- GTE comments on new DEN

## ***Background***

---

- On November 17<sup>th</sup> 2006, the European Commission published the Draft Explanatory Note on “Transparency”.
- GTE submitted to the European Commission the document “GTE comments on DEN on Transparency”, on last December 4<sup>th</sup> 2006;
- On February 5<sup>th</sup> 2007, the European Commission published a revised version of the Draft Explanatory Note on “Transparency”;

## ***General findings***

---

- GTE welcomes the improvements on the revised version of the DEN, which help in better clarifying the contents of the Regulation.
- GTE is pleased to have the opportunity to contribute further to the predisposition of the Explanatory Note providing other comments to the text with a view to:
  - better explain some advices provided on the previous version of the DEN;
  - comment on some new contents added on in the new version of the DEN.

## ***GTE comments on new DEN(1)***

---

GTE believes that:

- (12). Efforts have to be done by TSOs to align the services as much as possible with the market needs, having however clearly in mind the physical limitations of transportation business;
  
- (15)(25).The information provision to shippers has as a goal to provide the data necessary for access to and use of the pipelines. Other means (e.g. regulatory oversight) are used to ensure that TSOs offer all available capacity in a non-discriminatory manner.
  
- (26). TSOs should only provide those information as required to facilitate the market;

## ***GTE comments on new DEN(2)***

---

GTE believes that:

- (34). The publication of flow data with a detail equal to the nominations regime is an additional requirement to the Regulation.
  
- (37). Relevant points should be only those in which booking procedures are applicable.
