<sup>1)</sup> The scheme relies for this on other recognised schemes.

<sup>2)</sup> Only recognised for accurate data that land use change emissions (e<sub>l</sub>) referred to in point 1 of part C of Annex V are equal to zero, and on the appropriate geographic area referred to in point 6 of part C of Annex V (NUTS-2 region).

<sup>3)</sup> The scheme is a non-typical voluntary scheme that covers only assessment of greenhouse gas savings. Voluntary schemes using the tool need to ensure that it is applied appropriately and that adequate standards of reliability, transparency and independent auditing are met.

<sup>4)</sup> The scheme ensures that all relevant information on GHG emissions is transferred from economic operators upstream the chain of custody to the economic operators downstream the chain of custody.

<sup>5)</sup> The scheme is not formally recognised by the Commission for demonstrating compliance with Article 17(3)(c) but has taken measures
