

**Indirect Land Use Change  
CIAA contribution on the ILUC consultation**

---

**Question 1**

**Do you consider that the analytical work referred to above, and/or other analytical work in this field, provides a good basis for determining how significant indirect land use change resulting from the production of biofuels is?**

**CIAA (Confederation of the food and drink industries of the EU) notes that there are gaps between the figures used in the model calculations (in particular in the IFPRI study) and the data submitted by the Member States in their National Renewable Energy Action Plans. CIAA therefore asks the Commission to take this into account in its upcoming assessment.**

**CIAA is willing to work with the relevant services of the Commission on this important issue.**
