

Fernando Hernandez, Chair CEER/ACER EWG,
Florence Forum 2018

Overview on bidding zones and congestion management (Art. 13/14, Elec Reg)

- ❑ ACER/CEER have very serious concerns about the EP/Council proposals for Articles 13 and 14, which constitutes a clear deviation from the maximisation of capacities offered to the market, the free movement of goods and put into question some NRAs' core competences on congestion management
- ❑ ACER/CEER urgently appeal to the MSs and MEPs to reconsider this imprudent approach and come back to the initial EC proposal
