

5.4 Market integrity framework and transparency

European Electricity Regulatory Forum
Ljubljana, 15-16 May 2013

Market integrity framework and transparency

- Industrial consumers support measures aiming to increase market integrity and transparency.
- Industrial consumers would welcome early publication of the Implementation Acts in order to increase visibility for all market actors.
- IFIEC continues to insist on minimal administrative and financial burden for end consumers. Coordination and harmonization of different transparency legislation is absolutely necessary.
- IFIEC Europe would like to point out the importance of data security and protection, given the commercially sensitive nature of a lot of the required information.
- IFIEC would like to draw attention to some confidentiality problems for energy intensive industrial consumers regarding the publication of inside information, which could have a potential price effect on industrial commodity markets.
