of Energy Regulators

Capacity Allocation & Congestion Management NC – current status

Alain Marien

Co-chair ACER Electricity Network and Market Taskforce

24th Electricity Regulatory Forum
LJUBLJANA
15-16 May 2013

Drivers:

- Add value
- Promote existing initiatives
- Enable efficient implementation
- Ensure smooth cooperation, clear responsibilities & proper oversight

ACER recommends adoption of NC after:

- Amending:
 - timelines, capacity calculation, re-dispatching, regulatory approval, intraday, firmness, transparency & consultation
- Complement with Governance Guidelines

Constructive discussion:

with the Commission and ENTSO-E on

- Capacity calculation, Timelines, Cross-border re-dispatching, Intraday ...

Way forward:

- Continue cooperation with Commission & ENTSO-E
- Start implementation now!

Thank you for your attention!
