

Energy Infrastructure Package Implementation

- EURELECTRIC welcomes the achieved progress in implementing the Energy Infrastructure Package
- EURELECTRIC welcomes the 12 cross-border priority areas and corridors
- The projects included in the PCI list should be economically viable
- Regional groups overseeing the selection of Project of Common Interest (PCI) should **give better representation to regional stakeholders**. EURELECTRIC involvement in assessing the individual PCI proposals will be limited
- Inclusion of the storage projects into the PCI list is accepted, but the support should be limited to R&D storage projects
