

# Benchmarking smart metering deployment in EU

**Klaus-Dieter BORCHARDT**  
*Director – Internal Energy Market*  
Directorate-General for Energy  
European Commission

**European Conference on Smart Metering  
Deployment in the EU**  
**Brussels, 26 June 2014**

# 6 ways smart metering benefits consumers

## Energy Savings

- Accurate & frequent consumption data  consumption reduction &

## Energy Efficiency

- Detailed consumption measurements  identify energy efficiency improvements

## Innovative Services

- Smart home solutions/home automation  energy costs reduction

## Consumer Empowerment

- Switching suppliers and modifying contractual terms  easier, faster, cheaper

## Sustainability

- renewable sources, storage potential (micro-grids), electromobility

## Distribution System Efficiency

- Cheaper and more effective management  lower distribution costs

## ***Commission Benchmarking Report Adopted on 17 June***

### **"Benchmarking Smart Metering Deployment in the EU-27 with a focus on electricity"**

- **Commission Report (COM(2014) 356)**
- **Country fiches (SWD(2014) 188)**
- **Cost-benefit data analysis (SWD(2014) 189)**

[http://ec.europa.eu/energy/gas\\_electricity/smartgrids/smartgrids\\_en.htm](http://ec.europa.eu/energy/gas_electricity/smartgrids/smartgrids_en.htm)

European  
Commission

## Electricity: 16 Member States with Wide-Scale Roll-out by 2020

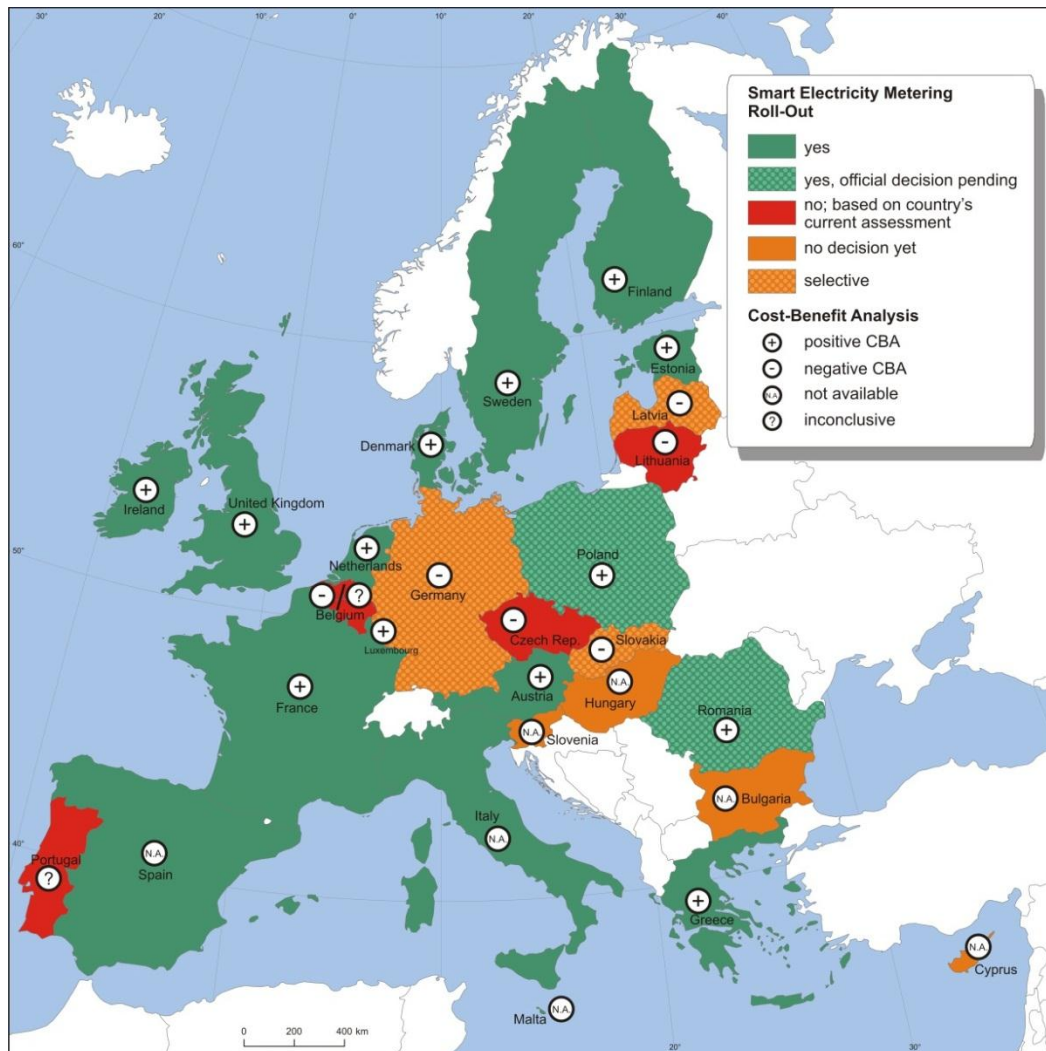

**Altogether: roll-outs in 19 MS => 72% EU electricity consumers with a smart meter by 2020**

European  
Commission

# Smart metering CBAs & roll-out plans: On target in electricity?

## Roll out of ELECTRICITY smart metering by 2020

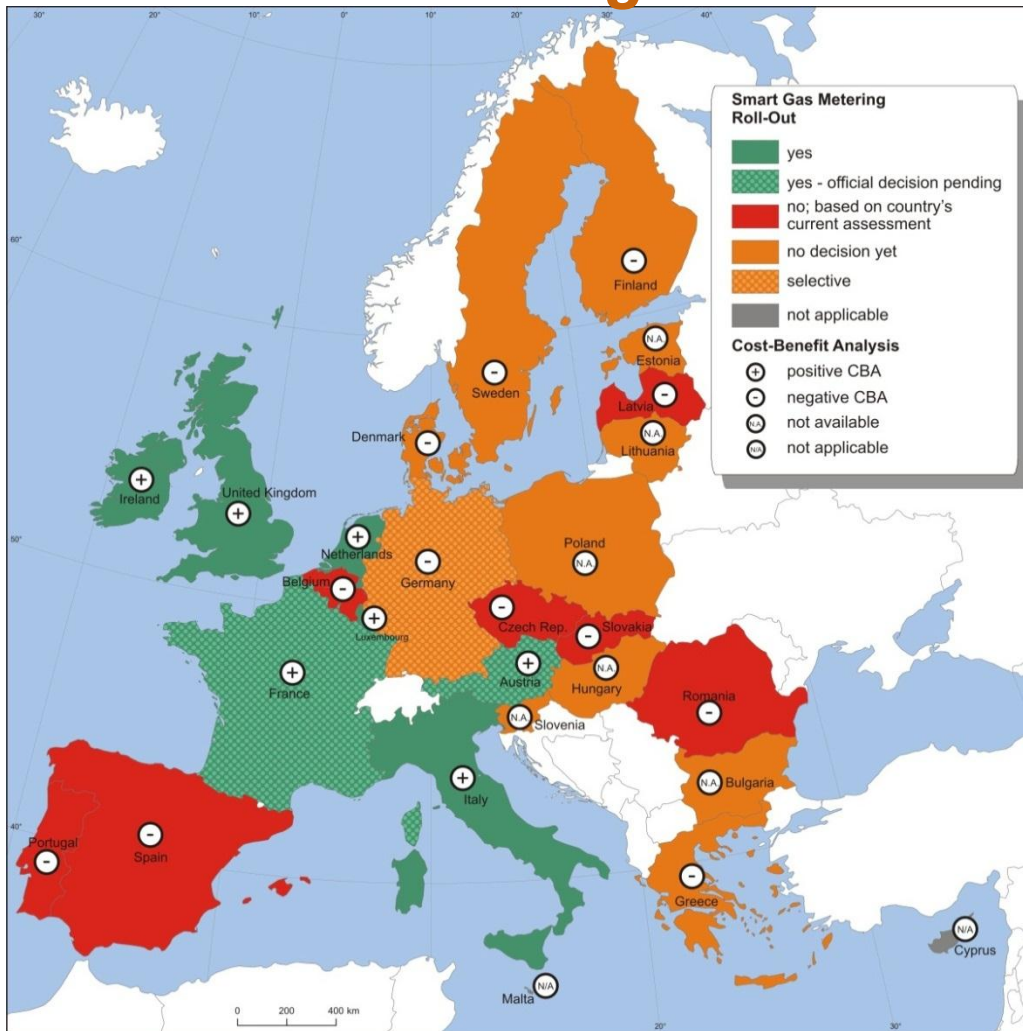

- ❖ 20 (21) CBAs, 16 MS: large-scale roll-out
- ❖ ~ 72% EU consumers
- ❖ 195 million meters
- ❖ € 35 billion

European Commission

# Smart metering CBAs: encouraging gas results?

## Roll-out of GAS smart metering by 2020

- ❖ 19 (20) CBA, 7 MS: wide roll-out
- ❖ ~ 40 % EU consumers
- ❖ 45 million meters
- ❖ €10 billion

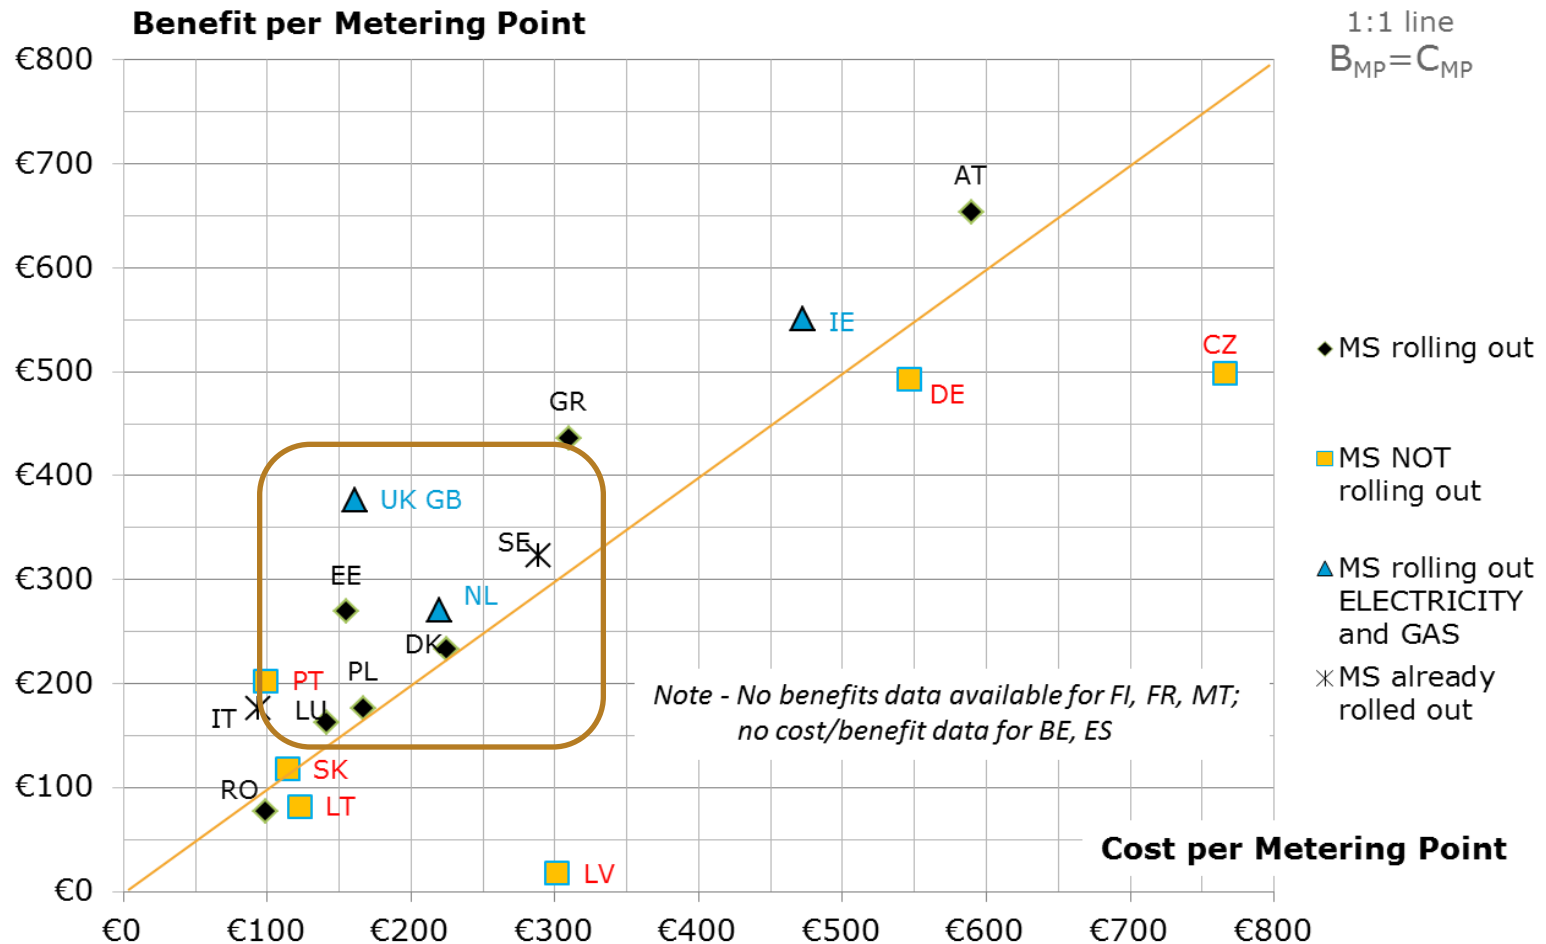

European  
Commission

# Smart metering for electricity – costs & benefits

## Costs & Benefits (normalised by number of metering points)

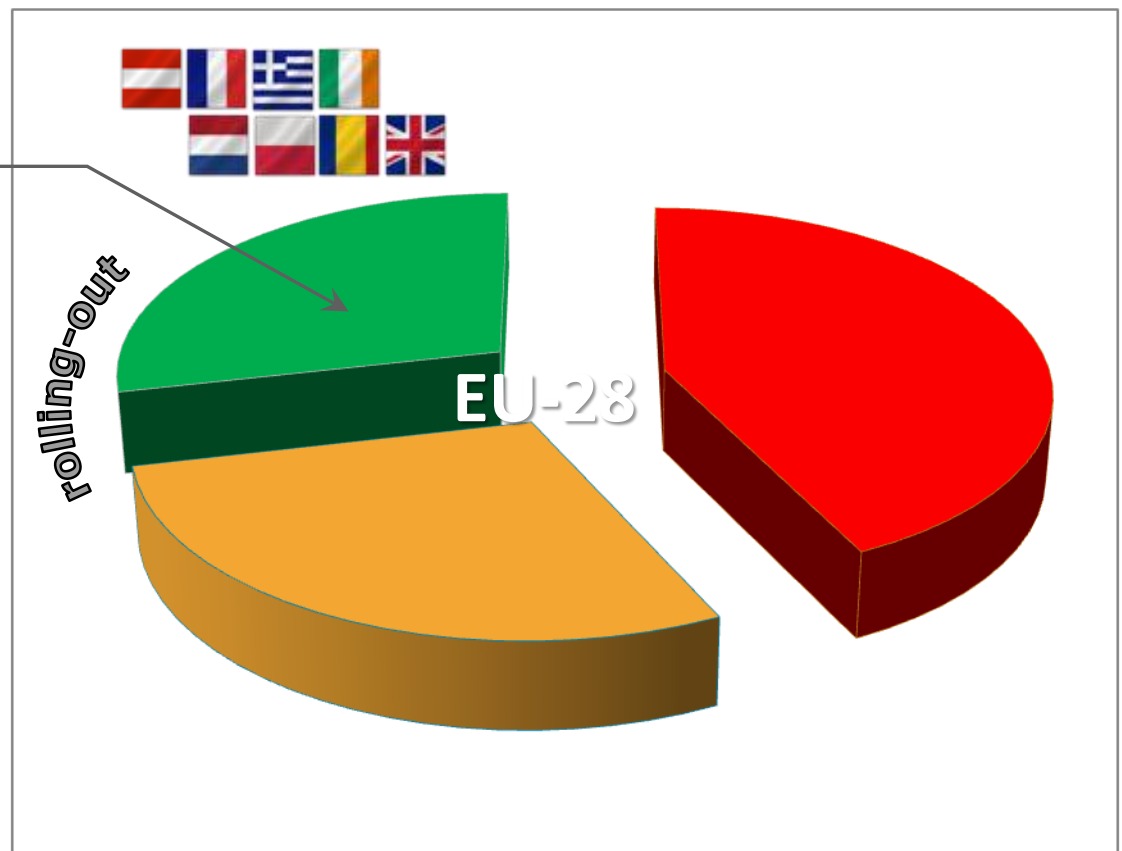

# 50% of roll-out plans follow recommended functionalities

in the 16 Member States proceeding with large-scale smart metering roll-out by 2020

8 Member States (50% of those rolling-out) consider all recommended functionalities

|                              |                                                                                                                                                                                                                                  |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CONSUMER                     | <ul style="list-style-type: none"> <li>a) Provide readings directly to the consumer and/or any 3<sup>rd</sup> party</li> <li>b) Update readings frequently enough to use energy saving schemes</li> </ul>                        |
| METERING OPERATOR            | <ul style="list-style-type: none"> <li>c) Allow remote reading by the operator</li> <li>d) Provide 2-way communication for maintenance and control</li> <li>e) Allow frequent enough readings for networking planning</li> </ul> |
| COMMERCIAL ASPECTS OF SUPPLY | <ul style="list-style-type: none"> <li>f) Support advanced tariff system</li> <li>g) Remote ON/OFF control supply and/or flow or power limitation</li> </ul>                                                                     |
| SECURITY - DATA PROTECTION   | <ul style="list-style-type: none"> <li>h) Provide secure data communications</li> <li>i) Fraud prevention and detection</li> </ul>                                                                                               |
| DISTRIBUTED GENERATION       | <ul style="list-style-type: none"> <li>j) Provide import/export and reactive metering</li> </ul>                                                                                                                                 |

## Set-up of smart metering deployment - electricity

Member States proceeding with large-scale smart metering roll-out by 2020

| Member States                                                                       | Metering Market | Responsible party -<br>Implementation & ownership | Responsible party -<br>Access to metering data |
|-------------------------------------------------------------------------------------|-----------------|---------------------------------------------------|------------------------------------------------|
|     | Regulated       | DSO                                               | DSO                                            |
|    |                 |                                                   | Central Hub                                    |
|  | Competitive     | Supplier                                          |                                                |

*FR – meters ownership is retained by local municipalities while DSO will operate them under a multi-annual concession*

## ***Securing consumer acceptance: Ensuring data protection, privacy, security***

### **Data Protection**

- **Data Protection Impact Assessment (DPIA) template**
- **Data Protection Reform of Directive 95/46**

### **Cyber-Security**

- **Identification of BATS for smart metering systems**
- **Minimum Security Measures**

## *Recommendations & Way Forward*

**Data handling options & review of DSOs tasks**

**Data Privacy & Security Framework; DPIA template & BATs**

**Incentives for innovation & services**

**Functionalities as in standards & Recommendation 2012/148/EU**

**Information campaign to enhance consumers' trust & confidence**

**Complete CBAs** ← pilot data/refine choices, assumptions

European  
Commission
