PROUD TO BE GREEN AND INNOVATIVE

Built by BOD Group in 2011.

Patented Heating/Cooling system created by our Engineers.

Maintains stable 22°C temperature and 50% humidity.

40% savings. We pay €0.30/m2 per month.

There must be a net metering law to provide the lowest cost for users.

SOLITEK- KNOW-HOW AND SPECIALIZATION

SoliTek researches, develops, manufactures, sells and installs solar cells & panels.

Any size project, any panel type.

Our specialization is top quality, EU manufactured glass-glass panels, designed for rooftops of any size and type.

We work with installers and distributors, as well private customers all across the EU.

AMBITIOUS BRAND FOR MARKET EXPERTS

● Historical sales and projects

Share capital	8.6 Million EUR
Assets growth	14%
People power	70 employees
Capacity	50 MW

PRODUCT PORTFOLIO

**Glass - Foil

BIFACIAL**

GLASS-GLASS MODULES

Certifications

IEC 61215
IEC 61730

GLASS-GLASS ADVANTAGES

Fire class A

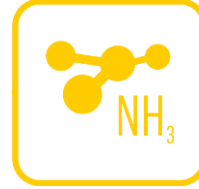

Extreme load resistance

Self-cleaning effect

Salt mist resistance

Ammonia resistance

Dust & Sand resistance

GLASS – GLASS BIFACIAL

SOLID BIFACIAL

Specifications:

- 300W / 340W front side
- Up to 75W / 85W backside
- 60 / 72 Mono N-Type Cells

SOLITEK BIPV

New building integrated PV

New-era Glass/Glass modules are developed and manufactured using electricity only from solar and geothermal energy - 100% renewable energy sources.

SoliTek is dedicated to client satisfaction and is able to customize production to fulfill clients' needs, unlike some of other major solar products manufacturers. Annual production capacity is 90 MW for solar cells and panels.

SoliTek BIPV is building integrated photovoltaic producer, supplying technologically advanced solar modules and solutions created to achieve architectural design in Nordic and Baltic region.

Facade, 44 kW, Estonia

OUR CUSTOMERS

Over 60% of our solar panels is exported to Sweden, Norway, and Germany. Over 90% to the EU as a whole.

The majority are PV installers, distributors, and project developers in the EU.

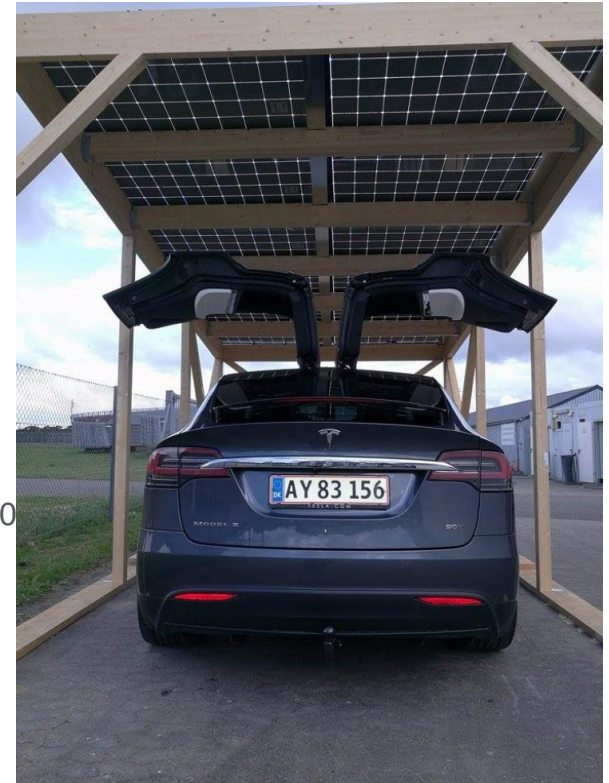

SOLITEK PROJECTS

4,6 MW solar modules in Turkey (Bursa). It delivers electricity to 110

Customized greenhouse, 23 kW, Sweden

Wooden Carport (GreenEnergy, 3.48 kW), Nor

SOLITEK PROJECTS

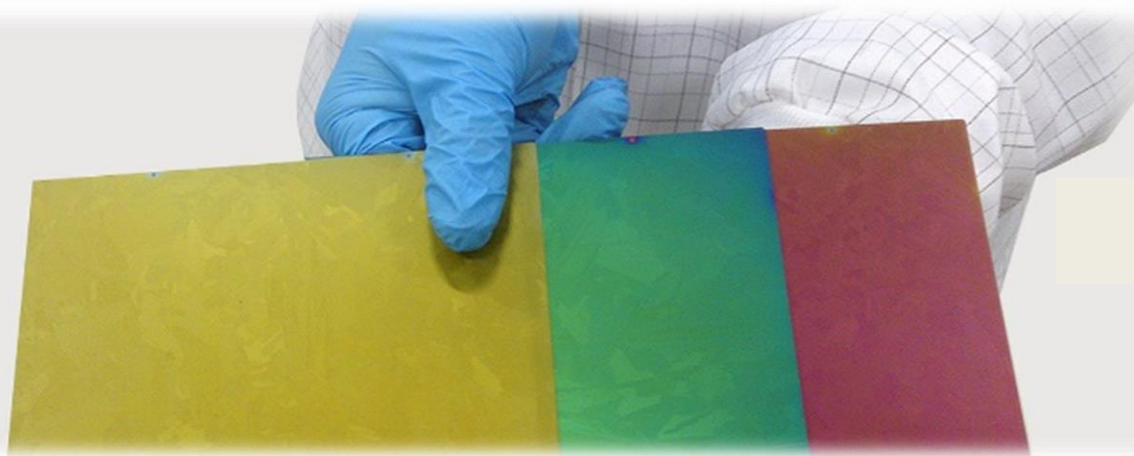

Ankara project 2000 kW, Turkey

Perak Pepper Plantation 1.5MW, Malaysia

THANK YOU!
