COMMISSION OPINION

of 10.1.2024

pursuant to Article 3a of Regulation (EC) No 715/2009 - Romania - Certification of DEPOMURES S.A. as gas storage system operator for UGS Targu-Mures

(ONLY THE ROMANIAN TEXT IS AUTHENTIC)
COMMISSION OPINION

of 10.1.2024

pursuant to Article 3a of Regulation (EC) No 715/2009 - Romania - Certification of DEPOMURES S.A. as gas storage system operator for UGS Targu-Mures

(ONLY THE ROMANIAN TEXT IS AUTHENTIC)

I. PROCEDURE

On 15 September 2023, the Commission received from the National Energy Regulatory Authority of Romania (hereinafter: “ANRE”), a notification of the preliminary decision concerning the certification of DEPOMURES S.A. (hereinafter: “DEPOMURES”) as gas storage system operator for UGS Targu-Mures.

Pursuant to Article 3a of Regulation (EC) 715/20091, as amended by Regulation (EU) 2022/10322, the Commission is required to examine the notified draft decision and to deliver an opinion within 25 working days to the certifying authority as to its compatibility with Article 3a of Gas Regulation.

II. DESCRIPTION OF THE NOTIFIED DRAFT DECISION

The underground natural gas storage capacity is ensured in Romania through 6 underground natural gas storage facilities with a total active capacity of 32.991 TWh per storage cycle, i.e. injection capacity of 269.470 GWh/d and extraction capacity of 344.100 GWh/d.

DEPOMURES is the second underground natural gas storage operator in Romania and was established in 2002. DEPOMURES operates the Targu-Mures underground natural gas storage facility with an active capacity of 3.155 TWh per storage cycle which accounts for 9.6 % of the total storage capacity of Romania. DEPOMURES stores natural gas underground and provides underground natural gas storage services: reservation of capacity, natural gas injection, and extraction of natural gas.

The company operates the UGS on the basis of the concession agreement concluded with the National Agency for Mineral Resources (ANRM) and the licence to operate the UGS issued by ANRE.

From a legal, organisational and decision-making point of view, DEPOMURES is an independent operator of the underground natural gas storage system, thus ensuring compliance with the principles and measures laid down in the legislation in force.

---

ANRE granted DEPOMURES the Licence for gas storage No 1984/2014, which is valid until 15 December 2027. By Order No 109/2018, ANRE approved the framework validity conditions attached to the licence for the operation of the underground natural gas storage system.

By Order No 97/2021 ANRE approved the Regulation establishing the compliance programme and the designation of the compliance officer by natural gas storage operators forming part of a vertically integrated economic operator, based on which DEPOMURES has established a Compliance Programme. The scope of the Compliance Programme is to establish complementary rules to ensure the exclusion of any discriminatory behaviour in relations with market participants and to ensure the objective of independence of the company.

The Ministry of Energy designated ANRE as certifying authority for the certification of the storage system operators in Romania by letter of 12 May 2023.

When issuing the draft certification Decision, ANRE took into account, as provided in the approval report, in particular: the Compliance Programme of DEPOMURES, drawn up in accordance with the applicable Regulation adopted by ANRE Order; the report of the designated compliance officer; the implementation of the Compliance Programme (annual reporting), including the measures ensuring the independence of DEPOMURES as regards its legal form, organisation and decision making process in relation to the other non-storage activities, and also regarding the independence of the management of the company.

ANRE took note that the conditions are met to mitigate the risks for the security of gas supply, with risks arising mainly from the ownership, commercial relationships that could negatively affect the incentives and capacity of DEPOMURES to fill the UGS facility. The Ministry of Energy provided a letter stating that no risks affecting the security of gas supply have been identified.

Ownership, supply, or other commercial relationships

DEPOMURES has as main shareholders GDF International S.A. (59 % of the shares) and SNGN ROMGAZ S.A. (40 % of the shares), being the sole private operator on the Romanian natural gas storage market. The other shareholders, each with 0,5% of shares, are DRILLING SONDE S.A. and S.C. MIF. S.A.

GDF International S.A. is organised as a public limited company, having as shareholders ENGIE S.A. (100%) and SPERANS S.A.S (one share). ROMGAZ is organised as a joint-stock company, having as shareholders the Romanian State (70%), legal persons (24,57%), and natural persons (5,41%).

ROMGAZ is organised as a joint-stock company having as main shareholder the Romanian State through the Ministry of Energy (70%). Since 2013 ROMGAZ is listed at the stock exchange. The Central Depository communicated to ROMGAZ that, on 13 October 2023, shareholders were: legal persons (24,57%, with only one legal person with more than 5%), and natural persons (5,41%). In April 2022 ROMGAZ informed its shareholders that it received a voluntary notification due to change in shareholding structure/organigram regarding NN Group N.V. holdings which exceed the threshold of 5%.

---

3 Address of ROMGAZ to ANRE of 22 November 2023
4 5,36%
of the voting rights within S.N.G.N. Romgaz S.A. NN Group is an international financial services company, active in 11 countries.

ANRE assessed that the shareholders of DEPOMURES do not pose a risk to security of supply within the European Union.

According to ANRE, Depomures has sufficient decision-making powers, independently of the vertically integrated operator, with respect to the operation, maintenance and development of the storage system. The compliance with the requirements to ensure a level playing field for all potential users of the system regarding access to and contracting of storage capacities were also checked.

ANRE concluded that DEPOMURES commercial relations show no negative effect on the filling, use or extraction of gas from UGS Targu-Mures and therefore do not pose a risk to the security of gas supply.

Rights and obligations of the Union or of Romania with respect to a third country

Following the letter received from the Ministry of Energy on 08.06.2023, ANRE concludes that there are no risks to the security of supply at national, regional or Union level, arising, inter alia, from the Union’s rights and obligations towards a third country under international law and the rights and obligations of Romania in respect to a third country.

Other specific facts and circumstances

ANRE reported no specific facts or circumstances that need to be mentioned in addition to the information already provided above and that could jeopardise the security of gas supply.

Draft decision from the certifying authority

ANRE concludes that DEPOMURES may be certified as a storage system operator for the gas storage facility UGS Targu-Mures under Article 3a of the Gas Regulation.

III. COMMENTS

Pursuant to Article 3a of the Gas Regulation, Member States shall ensure that each storage system operator, including any storage system operator controlled by a transmission system operator, is certified in accordance with the procedure laid down in the Gas Regulation, either by the national regulatory authority or by another competent authority designated by the Member State concerned.

In considering the potential implications to the security of supply in the Union, the certifying authority needs to take into consideration a series of risks, as set out in Article 3a (a) – (d) of the Gas Regulation. In particular, any ownership, supply or other commercial relationships with respect to third countries that could negatively affect the incentives and ability to fill underground storage facilities should be exhaustively analysed by the certifying authority.

The draft decision on certification for DEPOMURES was granted by ANRE. ANRE is the national regulatory authority. By letter of 13099 of 12 May 2023, the Ministry for Energy

5 https://www.londonstockexchange.com/news-article/SNGR/voluntary-notification-holdings-over-5-nn-group/15407956
6 https://www.nn-group.com/home.htm
required ANRE to assume the certification task referred to in Article 3a of the Gas Regulation. Therefore, ANRE fulfils the conditions of Article 3a (1) of the Gas Regulation and has the competence to issue the decision on certification.

The Commission shares ANRE’s opinion that there is no risk of security of gas supply arising from ownership or control of the storage facility UGS Targu-Mures. The Commission takes note of the statements of ANRE that, to its knowledge, UGS Targu-Mures is not subject (directly or indirectly) to any obligation or commitment towards third countries. Moreover, considering the aforementioned about ownership and control of DEPOMURES, and taking into account the referred statements of the Ministry of Energy and of ANRE, the Commission has no knowledge of any rights or obligations of the Union or of Romania with respect to a third country that would affect UGS Targu-Mures activities and present a concern in terms of risk to the security of energy supply. No risk for the filling, use, extraction and/or maintenance of UGS Targu-Mures was identified.

IV. CONCLUSION

Against the information provided in the preliminary decision notified by ANRE as regards the certification of DEPOMURES as storage operator for UGS Targu-Mures, after having taken into account the following:

- The ownership and control of DEPOMURES and its commercial relationships do not affect negatively the incentives and the ability of DEPOMURES to fill the underground gas storage facility Targu-Mures. ANRE has verified the ownership and control over DEPOMURES and found no evidence of risks to the security of gas supply at national, regional or Union level;
- There is no identified risk to the security of supply stemming from obligations or commitments which the Union would have towards third countries;
- There is no identified risk to the security of supply stemming from obligations or commitments which Romania would have towards third countries; and
- There are no specific facts and circumstances which would indicate further risks could negatively affect the incentives and the ability of DEPOMURES to fill the underground gas storage facility UGS Targu-Mures,

the Commission considers that there is no risk as regards security of gas supply stemming from the ownership of DEPOMURES, the relevant obligations towards third countries or other specific facts and circumstances.

Pursuant to Article 3a (7) of the Gas Regulation, ANRE shall communicate the final certification decision to the Commission.

Pursuant to Article 3a (10) of the Gas Regulation, ANRE shall continuously monitor DEPOMURES as regards compliance with the certification requirements set out in paragraphs 1 to 4 of Article 3(a). In case ANRE acquires any knowledge about a planned change in rights or in influence over DEPOMURES that could lead to non-compliance with the requirements of paragraphs 1 to 3 of Article 3(a), it shall open a certification procedure to reassess compliance.

The Commission's position on this particular notification is without prejudice to any position it may take vis-à-vis Member State regulatory authorities on any other notified draft measures concerning certification, or vis-à-vis Member State authorities responsible for the
transposition of EU legislation, on the compatibility of any national implementing measure with EU law.

The Commission will publish this document on its website. The Commission does not consider the information contained therein to be confidential. ANRE is invited to inform the Commission within five working days following receipt whether and why they consider that, in accordance with EU and national rules on business confidentiality, this document contains confidential information which they wish to have deleted prior to such publication.
