

A few words about CF/ERDF and support to energy projects

- Damien COCARD, DG REGIO
- Bucharest; 06/06/2019
- Second EE round table

ESIF current support to energy

- Types of investments
 - Mainly EE for residential and public buildings
 - Approx 750M€ ERDF
- Other types of investments
 - Public lighting, DHS, RES , CHP, smart metering for SMEs
 - Approx 450M€

Current state of play

- Residential blocks of flat
 - “Tripartite model” with support of ERDF
 - Main issues identified: involvement of association of owners, cofinancing from owners and municipalities, small RES integration in blocks, expertise
- Public buildings
 - Schols, hospitals, primarie,...
 - More active sector under ERDF
 - Main issues: EE vs overall rehabilitation or extansion of buildings, cofinancing from municipalities, loans froms banks
- DHS: started in 7 regions, stalled in Bucharest
- RES/CHP: limited results, pipeline to come

Future support from ESIF

- Under negotiation!!!
- Order of magnitude: 5-6 b€ (climate, environment, energy)
- Proposed sectors for EU cofinancing: residential (blocks), public buildings; small RES integration when possible, DHS
- Preparation is key!!!
 - Watch out: PNEC, renovationstrategy
 - Pipeline of projects: to be prepared in 2019-2020
 - How to better involve stakeholders and mobilise finance?
 - New criteria: more info in Q3/Q4 2019

European
Commission

Thank you
