

## 24<sup>th</sup> Meeting of the European Gas Regulatory Forum

Madrid, 15<sup>th</sup> October 2013

European Federation of Energy Traders

### Gas in the Future Energy Mix

- The perspective of energy traders

# Enabling gas to contribute to the energy market

---

- All energies should be integrated into the energy market
- Market-based level-playing field for all fuels and technologies
- Market solutions should be sought to cope with the other costs (CO2 emissions, intermittency, etc.)
- Need to focus on establishing gas trading throughout Europe

# Thanks for your attention

---
