

CMP Implementation and Upgrade of Transparency Platform

Madrid Forum 24

CMP implementation

- > TSOs and NRAs have devoted **considerable resources** to ensuring **timely and cost-efficient implementation** of CMP Guidelines
- > Experience gained during CMP implementation and CAM NC early implementation is highlighting **some areas where future improvements may be warranted (where justified costs vs. benefits)**
- > ENTSOG is working to **support progressive refinement and co-ordination** of the solutions adopted:
 - > Monitoring and analysis of implementation
 - > Identification of 'easy wins' for potential future alignment
 - > Development of data exchange requirements, or 'common network operation tools', for CMP Guidelines

Proposals for future alignment must be based on careful observation of existing solutions in practice

Upgrade of Transparency Platform

Improvements

- > Web design improvement to enhance user friendliness
- > Favourite points and routes
 - User can add more frequently used routes or interconnection points
 - Marked points/routes can be used more comfortably as the information is available by just a few clicks
 - Data is accessible without registration on the website in general
 -but the feature is available only for registered users as user administration is technically necessary.

Upgrade of Transparency Platform

Modified web design – Home Page <http://www.gas-roads.eu>

The screenshot displays the ENTSOG Transparency Platform Home Page. At the top, the ENTSOG logo is followed by the text "TRANSPARENCY PLATFORM". Below this is a navigation bar with links for "HOME", "POINTS & ROUTES", "MAPS", "FAVORITES", and "LOGIN". The main content area features an "INTRODUCTION" section with a paragraph about the platform's purpose in the context of gas market liberalization. To the right of this text is a larger ENTSOG logo with the tagline "european network of transmission system operators for gas". Below the introduction is a "PLATFORM NEWS" section. A news item dated "30 SEP 15:21" is titled "Upgrade of Transparency Platform" and describes the platform's upgrade to provide a common platform for data and information publication. The footer contains contact information for ENTSOG 2013, including telephone and fax numbers, and a "Terms and conditions of use" link. On the right side of the footer, there are "RELATED LINKS" for "gie - Gas Infrastructure Europe" and "qse - Aggregated Gas Storage Inventory".

INTRODUCTION

The liberalization process aimed at the creation of an internal gas market has significantly changed the gas transmission business and increased the need for transparency. In this respect specific obligations (Chapter 3 of Annex 1 to Regulation (EC) No 715/2009 and its amendments) for TSOs have been introduced through the European as well as national legislation. The Transparency Platform has been therefore designed to facilitate access to transmission networks by, among other things, making all the information available in an organized and structured way on a single website. The Transparency Platform also publishes links to individual TSOs websites dedicated to TPA information offering thus a useful navigation tool for gas network users.

PLATFORM NEWS

30 SEP 15:21 **Upgrade of Transparency Platform**
ENTSOG
The transparency guidelines and congestion management procedures (Chapter 3 of Annex 1 to Regulation (EC) No 715/2009 and its amendments) require ENTSOG to provide a common platform for data and information publication. The upgraded Transparency Platform is now available for all market participants to use. As of 1 October interested parties will be able to access valuable technical and commercial information uploaded by 41 TSOs. The common platform makes comparisons and quantitative analysis easy for all market participants. Any data missing will be available as soon as possible.

Upgrade of Transparency Platform

Modified web design – Overview Operators

The screenshot displays the 'entsog TRANSPARENCY PLATFORM' website. The header includes navigation links: HOME, POINTS & ROUTES, MAPS, FAVORITES, and LOGIN. Below the header, there are tabs for SELECT POINT, SELECT ROUTE, and AVAILABLE OPERATORS. The 'AVAILABLE OPERATORS' tab is active, showing a search bar and filters for ALL, PARTICIPATING OPERATORS, NAME, and COUNTRY. The main content area is a grid of operator cards, each featuring a logo, name, and a 'Link to Homepage' button. The operators listed are: Gas Transport Services, GASCADE Gastransport GmbH, Gaslink Independent System Operator Ltd, Gastransport Nord GmbH, Gasum Oy, Gasum HE, Gasum Deutschland Transport Services, GRTgaz, GRTgaz Deutschland, DESFA, Interconnector, Jorrigas Transport, National Grid, NEL, and METAGAS. The footer contains contact information for entsog, including a phone number, fax, email, and website, as well as links to terms and conditions, disclaimer, manuals, contact, and message archive.
