Brussels, 13 November 2018

Commission welcomes European Parliament adoption of key files of the Clean Energy for All Europeans package

New rules on renewables, energy efficiency and the governance of the Energy Union have been signed off by the European Parliament today – an important step in enabling the European Union and its Member States to embrace the clean energy transition, follow up on the already adopted 2030 climate legislation and meet the Paris Agreement commitments.

Today European Parliament completed the parliamentary approval of half of the eight legislative proposals in the 2016 [Clean Energy for All Europeans](#) package, following the [Energy Performance in Buildings Directive](#), which came into force on 9 July. The package is a key element of the Juncker Commission's political priority of "a resilient Energy Union with a forward-looking climate change policy", aimed at giving Europeans access to secure, affordable and climate-friendly energy and making the European Union world leader in renewable energy.

Vice-President responsible for the Energy Union Maroš Šefčovič said: "With today's vote, we unlock the true potential of Europe's clean energy transition, helping us meet our Paris Agreement goals and translating into more jobs, lower energy bills for consumers and less energy imports. The Energy Union is coming of age, going from strength to strength".

INSTRUMENTO DE GARANTIA- SFSB

In the context of the European Investment Plan, the European Investment Bank (EIB), with the support of the European Commission, adopted in February 2018 **a brand new financial instrument** — within the framework of **the Smart Finance for Smart Buildings Facility** — which will make investments in energy efficiency projects for buildings more attractive to private investors, and will multiply the effect of the EU money invested. This will be done through the **use of EU funds as a guarantee** for these projects, **creating a market** for energy efficiency projects. This Smart Finance for Smart Buildings initiative, backed by the new financial instrument, technical assistance from ELENA, and together with other EU policy initiatives for smart buildings, aims to:

- ▶ **unlock €10 billion of public and private funds** between now and 2020 for energy efficiency projects;
- ▶ support **220,000 new or retained jobs**;
- ▶ create a **renovation market for small businesses worth up to €120 billion**;
- ▶ take up to **3.2 million families out of energy poverty**.

Energy

CON HERRAMIENTAS DE ASESORAMIENTO TRANSPARENTES Y ACCESIBLES

La legislación de eficiencia energética refuerza la las ventanillas únicas para los consumidores

- 1. Punto de entrada único**
- 2. Posibilita evitar la fragmentación de oferta y demanda**
- 3. Posibilidades de financiación para poner en marcha 'one stop shops', agregar, replicar y estructurar: EIB, ELENA, H2020 PDA**
- 4. Intercambio de buenas prácticas: conferencias, SEIF, Manag'Energy**

Y EXPLORANDO FUENTES E INSTRUMENTOS DE FINANCIACION INNOVADORES

- ✓ Green municipal bonds
- ✓ Earmarking environmental or energy taxes
- ✓ Energy performance contracting
- ✓ Renewable energy communities and local energy cooperatives
- ✓ Soft loans for home renovation works
- ✓ On-tax financing
- ✓ Third-party investment
- ✓ On-bill financing
- ✓ Crowdfunding
