n GTE comments on the Report

Gas Transmission Europe

Background

- n ERGEG published the Transparency Report 2007 (Version 7) on June 25th 2007
- n At the Madrid Forum JWG, July 17th 2007, GTE provided initial comments to the Report.
- n GTE would like to add some further comments:
 - ü with a view to actively contribute in transparency improvements;
 - ü in order to provide some suggestions for the structure and the analysis of the Report.

Gas Transmission Europe

GTE comments to the Report

- n GTE believes the ERGEG Transparency Report should distinguish between:
 - ü monitoring of the provisions of Regulation 1775/2005;
 - ü provision of additional market information requirements.
- n GTE is continuing to work in order to provide the information the market needs to operate effectively
- n GTE supports enhanced information release provided:
 - ü the release will not prejudice any TSO customer or other stakeholder,
 - ü the release will not prejudice the TSO, and,
 - ü the cost of the information provision should be covered.

GTE comments to the Report

- n GTE believes that some answers have been misinterpreted or incorrectly represented in the Report:

- ü “Not Applicable”, “Not known” or empty cells answers translated as no-fulfillment of Regulation 1775/2005;

charts to represent the answers to each question together with further explanation where there is apparent no fulfillment

- n GTE believes that there is a need to understand the reasons for non compliance and to identify the areas where TSOs have to improve, through constructive dialogue with each NRA
