EREGG view

- Ø **Voluntary implementation of CBPs is unsatisfactory**
- Ø **Sufficient time was foreseen for their implementation**
- Ø **Interoperability rules need to be made legally binding**
- Ø **EASEE gas could be the best platform to develop CBPs since all stakeholders are involved in the drafting process – not just TSOs**

- Ø **How to ensure voluntary implementation under the 3rd package?**

- Ø **Track record of “voluntary compliance” is not very good !**
