

Report on the dialogue with Slovenian stakeholders.

The fifth stakeholders' energy dialogue was held by the EC representation in Slovenia, on 15 July, a day after the Commission College adopted the [package of legislative proposals aimed to deliver the European Green Deal](#).

The dialogue took place during the high-level webinar '**Climate energy package "Fit for 55"- How will the new legislative package affect the economy and how should the economy prepare?**', organised in cooperation with the Center of Energy Efficiency Solutions (CER) in Slovenia.

In the context of the European Green Deal, and in particular the aforementioned new climate and energy package, the online event highlighted the legislative proposals to the relevant Slovenian stakeholders from different fields (environment, energy, economy, and finance) and opened the public discussion around the package.

Representatives of the EU and national decision-makers, financial institutions, creators of the business landscape and the future presented their views on what opportunities and challenges the new proposed legislative framework brings, and what will need to be done to achieve the new goals.

There were 180 participants registered from 144 organisations. The event was web streamed by the Slovenian Press Agency that added some 1,500 additional views.

Ivo Schmidt, Deputy Head of Unit Economic Analysis and Foresight, Recovery , gave a presentation on the economic implications of the package for the Slovenian businesses. The presentation was followed by a Q&A session moderated by Suzana Carp from the Bellona Foundation.

According to the Bellona foundation, the package would require extensive synergies between different sectors as well as massive investments in infrastructure and innovation for its main targets to be achieved. Bellona flagged the fact that the electrification of mobility and the decarbonisation of many sectors would affect the total volume of electricity generated in the future, which may challenge the final impact of the decarbonisation strategy for the EU.

Other questions were related to carbon accounting, limitations of the electricity grid to support electric mobility and the production of low carbon fuel standards.

At the end of the event, there was a panel discussion on how to generate and finance green projects and investments to reach the EU climate target plans of 55 % net reduction target. Ivo participated as an active listener, by intervening over the discussion that lasted around 70 minutes.

The full summary of the event, together with the event recordings and presentations are available via the CER [website](#).

Annex – Event Agenda

09.00

Opening by

Ana Struna Bregar, izvršna direktorica CER

Jerneja Jug Jerše, Head of the European Commission Representation in Slovenia

Andrej Vizjak, Minister, Ministry of the Environment

Gregor Benčina, CEO Slovenijales Group d.o.o., Vice president CER

Fit for 55 package – what does it mean for business

Ivo Schmidt, European Commission, Directorate General for Energy

Discussion Q&A with participants moderated by Suzana Carp, Bellona Foundation

Energy and other green projects

Francesco Ferrero, Head of the EIB Office in Slovenia

What are necessary next steps for EU countries and business regarding Fit for 55 Package – e mission reduction target by 2030

Martin Porter, Executive President of the Cambridge Institute for Sustainability Leadership in Brussels

Business for active climate responsibility. A study on 200 companies' profitability and their climate efforts.

Nina Ekelund, Executive Director Haga Initiative, Sweden

11.25

Break

11.35

Ana Vučina Vršnak, Assistant Executive Director, Slovenian Energy Chamber representative

Panel discussion on how to generate and finance green projects and investments to reach the EU climate plans of 55% net reduction target

Jože Bajuk, Board Member, Petrol

Saša Bavec, Board Member, Knauf Insulation Group

Gašper Jež, Director Project and Export Financing, SID banka

Draško Veselinovič, CEO, SBRA v Bruslju

Moderator: **Mateja Treven**, CFA, Blockhapp

Active listener: **Ivo Schmidt**, European Commission, Directorate General for Energy
