1. Key energy figures

![Energy mix - 2021](Image)

**Energy mix – 2021**

- Coal and coal products: 37%
- Oil and oil products: 25%
- Natural gas: 87%
- Renewables: 1%

**Electricity mix - 2021**

- Natural gas: 36%
- Renewables, biofuels, biomass: 64%

5. Recovery and Resilience Plan contribution to the Green Transition

Total budget\(^1\): EUR 1.83bn in grants

Estimated expenditure contributing to the green transition: 38.78\(^2\)%

![Climate tagged contribution](image-url)

6. Energy Country Specific Recommendation (CSR) 2022\(^3\)

Reduce overall reliance on fossil fuels and diversify imports of fossil fuels by accelerating the deployment of renewables, ensuring sufficient interconnection capacity, diversifying energy supplies and routes and reducing overall energy consumption through ambitious energy efficiency measures.

---

\(^1\) Updated allocation on the basis of Article 11(2) of the RRF Regulation

\(^2\) [Recovery and Resilience Scoreboard (europa.eu)]

\(^3\) Council of the European Union 9761/22
Notes:

(a) The data up to 2020 are Eurostat data.

The data for 2021 are DG ENER estimation based on Eurostat monthly data

(b) Negative value indicates net exporter: country that exports more fuels than it consumes. Values higher than 100% mostly refer to the build of stocks (increase of fuel in stocks), however might be also a result of statistical discrepancies in raw data.

(c) Eurostat (2020), share of Russian imports over total imports of natural gas. For the EU27 average, the total imports are based on extra-EU27 imports. For LV, total imports include intra-EU trade.

(d) As of 28/09/2022, 13 Member States are either partially or fully cut off from Russian gas (LT, BG, PL, DE, FI, DK, NL, IT, FR, AT, CZ, SL, LV).

(e) The graph has been created on 15/09/2022 and covers filling level data from 01 November 2021 to 13 September 2022.

(f) Households electricity prices, band DC, from EUROSTAT
(link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_204__custom_3372694/default/table)

Industrial electricity prices, band ID, from EUROSTAT
(link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_205__custom_3372745/default/table)

Households gas prices, band D2, from EUROSTAT
(link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_202__custom_3407307/default/table)

Industrial gas prices, band I3, from EUROSTAT
(link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_203__custom_3407318/default/table)

Wholesale Electricity and Gas prices, Platts (subscription-based access).

Platts calculates wholesale electricity prices based on weighted averages of traded volumes.

(g) The green objective is presented under 7 different categories taken into account the intervention fields (SWD(2021) 184 final): Renewables (028 - 032), Hydrogen (022, 027, 029, 032, 033, 074, 077 and ADHOC), Energy Efficiency in the public sector (026-026bis), Energy Efficiency in private buildings (025-025bis), Energy Efficiency in New Buildings (025ter), Energy Efficiency in Industry (24-024ter), Grids (033-034bis), Skills (01). For the cases in which hydrogen measure is identified in one of the following intervention fields (i.e. 029 - Renewable energy: solar; 032 - Other renewable energy (including geothermal energy); 033 - Smart Energy Systems (including smart grids and ICT systems) and related storage.) this amount was deducted from the respective categories (i.e. renewables and grids).
