5. Recovery and Resilience Plan contribution to the Green Transition

**Total budget**: EUR 6bn in grants and EUR 2.7bn in loans

**Estimated expenditure contributing to the green transition**: 51.12%

**Climate tagged contribution**

- Production of Renewables
- Hydrogen
- E. Efficiency Public Sector
- E. Efficiency Private Buildings
- E. Efficiency New Buildings
- E. Efficiency Industry
- Energy networks and infrastructure
- Green Skills

6. Energy CSR 2022

Reduce overall reliance on fossil fuels and diversify imports of fossil fuels. Accelerate the deployment of renewables by further facilitating grid access, introducing measures to streamline permitting and administrative procedures and modernising the electricity network. Reduce reliance on natural gas in heating and industry. Adjust renovation policies to accelerate and incentivise deep renovations of buildings.

---

1. Updated allocation on the basis of Article 11(2) of the RRF Regulation
3. Council of the European Union 9773/22
Notes:

(a) The data up to 2020 are Eurostat data.

The data for 2021 are DG ENER estimation based on Eurostat monthly data

(b) Negative value indicates net exporter: country that exports more fuels than it consumes. Values higher than 100% mostly refer to the build of stocks (increase of fuel in stocks), however might be also a result of statistical discrepancies in raw data.

(c) Eurostat (2020), share of Russian imports over total imports of natural gas, crude oil and hard coal. For the EU27 average, the total imports are based on extra-EU27 imports. For SK, total imports include intra-EU trade. Crude oil does not include refined oil products

(d) As of 28/09/2022, 13 Member States are either partially or fully cut off from Russian gas (LT, BG, PL, DE, FI, DK, NL, IT, FR, AT, CZ, SI, LV).

(e) The graph has been created on 15/09/2022 and covers filling level data from 01 November 2021 to 13 September 2022.

(f) Households electricity prices, band DC, from EUROSTAT (link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_204__custom_3372694/default/table)

Industrial electricity prices, band ID, from EUROSTAT (link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_205__custom_3372745/default/table)

Households gas prices, band D2, from EUROSTAT (link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_202__custom_3407307/default/table)

Industrial gas prices, band I3, from EUROSTAT (link: https://ec.europa.eu/eurostat/databrowser/view/NRG_PC_203__custom_3407318/default/table)

Wholesale Electricity and Gas prices, Platts (subscription-based access).

Platts calculates wholesale electricity prices based on weighted averages of traded volumes.

(g) The green objective is presented under 7 different categories taken into account the intervention fields (SWD(2021) 161 final): Renewables (028 - 032), Hydrogen (022, 027, 029, 032, 033, 074, 077 and ADHOC), Energy Efficiency in the public sector (026-026bis), Energy Efficiency in private buildings (025-025bis), Energy Efficiency in New Buildings (025ter), Energy Efficiency in Industry (24-24ter), Grids (033-034bis), Skills (01). For the cases in which hydrogen measure is identified in one of the following intervention fields (i.e. 029 - Renewable energy: solar; 032 - Other renewable energy (including geothermal energy); 033 - Smart Energy Systems (including smart grids and ICT systems) and related storage.) this amount was deducted from the respective categories (i.e renewables and grids).
